

**Press Release: Immediate**

Hyderabad, India Friday, May 16, 2008: VantageTrade.com is an automated global stock analysis portal which uses proprietary trend tracking algorithms generating unambiguous **BUY SELL signals, Stock Picks, Suggestions, Analysis and Alerts.**

VantageTrade scans each stock to determine the change in the trend. Each such change is automatically captured as a **BUY** or **SELL** signal for that particular day and displayed on the chart. The scan results into Stock Picks and provides a list of Stocks with strongest change in trading trend for the next trading day.

VantageTrade provides the best end of the day **Stock Picks** and **BUY SELL** signals on all exchanges in the US, UK and India.

Keeping in mind the Intuition and Navigation metrics, vantageTrade has been developed with an extremely user friendly interface for the 'Retail investors.'

In this era of information overload, it is imperative for an investor to make the right decisions on investments.

The inability to make clear and accurate decision can incur losses and increase in stress levels unless the investor has access to information that is well analyzed and can be deciphered easily.

Looking at the volatile world of Stocks, it is a challenge for investors to follow the trend and the pulse of the Stocks and the Stock Markets, globally.

vantageTrade.com is a web based revolutionary trend tracking system which is a fusion of technical analysis and technology. It has been designed and developed by a team of experienced Analysts, Statisticians & Developers at Forceites Pvt. Ltd.

The outputs of vantageTrade enable the investor to **Exit or Invest** as the trend changes thus making profits by beating the market trend.

This portal has been rigorously tested for its accuracy and reliability in providing accurate **BUY SELL** and **Exit** signals under various scenarios and market conditions. . The test results indicate that that this system will provide the investor an unmatched edge by remaining always on top of today's dynamic markets.

The extremely friendly user interface along with a navigation help wizard has been developed after thorough research. This makes it the perfect system for advanced users and novices alike.

Investors stand to be well informed about the market trends and can ensure their trading decisions are well planned and protected against any negative eventualities by using vantageTrade and following its suggestions.

## Key Features:
