Got Web Host Offers SEO Shared Hosting

Valparaiso, IN
June 3, 2008

Got Web Host, the original SEO web hosting company, is now providing SEO Shared Hosting plans. SEO shared web hosting is the latest in the multiple virtual and dedicated hosting plans offered by the company.

Director of Sales & Business Development, Lloyd Brown, said of the addition, "these virtual hosting plans provide IP's across multiple Class C like our other SEO web hosting plans, however, we will share the IP's rather than providing dedicated IP's like we do on our other virtual plans. These plans are for people that don't feel the need for dedicated IP's but still want to spread their sites across multiple Class C's."

Tanya Martin, Director of Internet Marketing, added, "These are the only plans that come with shared IP's and user level control panels. Our other SEO virtual web hosting plans will continue to provide reseller level control panels and dedicated IP's, as we always have."

In order to ensure reliable service, these shared plans will have limitations on some features such as the number of domains and MySQL databases, but for the webmaster that is on a budget, these value plans are a great option. With up to nine different Class C ranges available, each IP will come with its own control panel login. It is a little more work, but the saving make up for it.

"Too many times I hear and read about web hosts that oversell their virtual servers causing unnecessary downtime for the web sites. We have designed these plans in such a manner that this will not become an issue. It also gives the webmaster the opportunity to test our reliability and customer service so when it comes time to upgrade they will know what to expect," Brown stated.

About Got Web Host:

Got Web Host has been hosting websites since 2002. As times change, hosting needs change as well, to which we strive to bring the best hosting solutions to meet these changes. Multiple Class C IP's are difficult, if not impossible to find with most hosting companies.

Many simply cannot provide multiple dedicated IPs. Got Web Host now offers Multiple Class C IP's to their users. Several web hosting companies are now attempting to break into this market. Got Web Host not only offers the service, but also understands why you need it and we bring it to you with many different packages.
