

Renovation Report

If you're considering a home renovation but are not sure about the available options, let us help you make the right choices based on your desired goals and preferences.

We make your life easier by cutting through the convoluted world of “green” and “energy efficient” products for you. All you have to do is tell us what you want to accomplish in your renovation, and we'll make clear recommendations.

We address concerns such as:

- What can I do to make the air healthy inside my house?
- Is installing solar electric a good choice for me? Is it cost effective?
- What heating systems are efficient and cost effective? What about geothermal?
- What are smart choices for healthy, green materials?
- Which insulation is healthier and performs best?
- How can I select a window that's right for my house?
- What are smart ways to conserve water?

Please use the worksheet to:

Tell us about your home

- Plans (if available)
- Pictures
- Size (square footage)
- Number of Bedrooms
- Number of Bathrooms

Tell us about your goals

- Type of Renovation:
 - o Addition? Bathroom and Kitchen? Full gut to frame?
 - o Which part are you looking for input on?
- Your budget
- Your preferences regarding: Energy, Water, Air quality, Materials
- Your use behaviors:
 - o Laundry (loads/week)
 - o Dishes (loads/week)
 - o Cook (how often you cook)
 - o Thermostat setting (preferences)
 - o Number of people residing in the home

Typical Report Results include product recommendations or performance specifications based on your responses to our survey of renovation preferences. Recommendations will typically fall into the following categories:

Energy

- Renewables
 - Solar Electric
 - Solar Thermal
 - Wind
- Geothermal
- Energy Efficiency
- Appliances
- Thermostats
- Insulation
- Windows
- Heating and Cooling
- Lighting

Water

- Landscaping
- Fixtures
- Reuse/Greywater/Reclamation
- Rainwater catchment

Materials

- Rapidly renewable
- FSC certified
- Recycled
- VOC-free materials
- Other green materials
- Sound dampening

Air

- HVAC (Ventilation)
- Non-Off-gassing materials
- Low-VOC materials
