Inventory Management Solution

CITIXSYS

Inventory Pro for SAP® Business One

Enhanced and Optimized Inventory Management

Intense competition and varying customer demands are making it intricate for growing enterprises to sustain business growth. Achieving steady growth statistics above average is certainly a complicated and difficult task.

In the time of technological boom, business is all about managing dynamically, delivering efficiently and maintaining long-term customer relationship. At the end, informed management and complete control over your retail business is of paramount importance.

Regulating business in an organized manner has paid dividends in every business. Efficient management controls and innovation can give business a hike. In-depth market knowledge, proficient Inventory Management leads to the path of success.

Inventory Pro is a dynamic Inventory Management Solution designed specifically for organizations to take control of their inventory volumes. It helps to track each activity from stock search to stock transfer and purchase to sale.

Bin Location Management: Selectively enable bin location functionality per warehouse

Available to Promise (ATP): Tightly integrated with SAP Business One Sales Order entry

Multiple Units of Measure (UoM): Provides the ability to specify pricing for each unit of measure

The robust package is user-friendly and developed to track your inventory accurately. Flexible functionalities like Bin Location Management, Allocations, Available to Promise and Multiple Units of Measure are key strengths of the package.

The unique functionalities powered with standard reports and searching capabilities enables a user to solve day to day inventory problems. Inventory Pro seamlessly integrates with Item Matrix 4.0 from CitiXsys which is an add-on built on the top of SAP Business One and addresses business processes where attribute based Item Codification/Stock Keeping Unit (SKU) is required.

The accurate Inventory Management reports allow maintaining and monitoring the inventory at optimal levels. It enables stock planning to ensure timely delivery of customer orders.

The inherent features of handling transactional inventory volume deals with multiple items at one go. Inventory Pro efficiently controls the right amount of stock in the right place at the right time.

Explore new business avenues with more organized, systematic and compact Inventory Management Solution. Make strategic business decisions with logistics planning.

Managing your inventory efficiently means to remain informed about your stock all the time. Inventory Pro from CitiXsys is the solution which does all these for you.
