

# Warehouse Management

## Warehouse and Distribution Solution

CITI X SYS

# That Item Came In. It Got Put-Away. Somewhere. We Need to Find It. But Where? We Have to Ship It. But How?

## Unmatched Capabilities

Warehouse Management is a powerful and comprehensive automated Warehouse and Distribution Solution that combines solid business principles and state-of-the-art technology. With CitiXsys Warehouse Management, you can manage and track the movement of inventory from receiving to shipping and dramatically cut warehouse costs by eliminating paper work and costly shipping errors. It also helps to improve staff productivity and provides accurate inventory levels to all inter-company departments.

## Unrivaled Flexibility

Unlike many systems which require you to alter business operations CitiXsys Warehouse Management is programmed from the ground up to provide optimal flexibility and conformance to your warehouse environment.

Because the system allows customization capabilities, users can define various elements of their unique operations.

CitiXsys Warehouse Management also uses industry standard report and label writers for all system reports and to generate system labels. These tools enable the user to quickly change existing reports and labels or to add new ones with minimal expenses.

## Unbeatable Technology

At the heart of CitiXsys Warehouse Management is a robust client/server architecture based on the Windows Operating environment. The use of client/server technology provides a gateway for growth unsurpassed by traditional, legacy systems. As your warehouse needs change, CitiXsys Warehouse Management will adapt to those changes and provide a solid migration path.

*Managing Your Warehouse and  
Distribution Operations Just Got  
Easier.*

## Warehouse Management: Warehouse and Distribution Solution

Features	Benefits
<b>System Administration</b> Required module allows system administrator to set up the warehouse	<ul style="list-style-type: none"> <li>• Easily define warehouse locations, units of measure, rack types, security, and printers.</li> <li>• Allows group locations into a variety of zone structures to accommodate put-away, inventory count and picking operations.</li> </ul>
