

Abso® and Reliant Live Partner to Help HR Teams Work Smarter Integrated Skills Testing Improve Workflow for HR Staffs Doing More with Fewer Resources

Roseville, CA (PRWEB) June 19, 2008 -- Abso®, a leading provider of integrated talent management solutions, and Reliant Live, an innovator of online assessments and learning environments, have partnered to help HR teams maximize their organizations' talent. Reliant Skills testing are now fully integrated into Abso Talent Edition™ helping HR evaluate candidates and existing employees, all while helping manage workload more efficiently.

Streamline Hiring By Integrating Skills Testing

Abso Talent Edition, a web-based solution, enables HR managers to streamline talent management tasks for acquiring, screening, assessing, and onboarding employees. The seamless integration of Abso and Reliant Skills testing makes it easier and faster to manage information—by presenting a unified view of candidate data and eliminating manual steps and multiple file systems that drain resources. HR managers can initiate skills tests, review results, and even search for candidates by test results from a single interface, helping them match candidates to the right positions more quickly.

Reliant Skills tests measure knowledge, skills, and ability required for an individual's job success. Pre-defined skills tests make testing fast and easy for a range of positions including accounting, clerical, engineering, healthcare, technical, computing, retail, warehouse, call center, and more. In any industry, skills testing can be used during the hiring process to consistently evaluate candidates and prioritize recruiting efforts. Reliant Skills tests are content-valid and comply with Equal Employment Opportunity Commission (EEOC) guidelines.

Improve Workflow and Quality

"This partnership brings together great technology that can vastly improve workflow and quality for HR staffs," stated Bryan Wempen, Vice President of Business Development at Reliant Live. "But it's more than that. We respect and share Abso's passion for our customers. We work to understand the HR needs in today's challenging economy and deliver technology and a personal-touch that helps them gain unparalleled efficiency."

Post-hire, Reliant Skills tests help HR build consistency and efficiency into their productivity and performance improvement processes. Together with Reliant LMS, an online learning system, HR teams can initiate appropriate training to build employee knowledge and track compliance to training goals.

Hire the Best Talent

"Today more than ever, HR leaders must focus on hiring the best talent, and they must develop existing talent to reduce turnover and maximize productivity. As HR tries to do more with fewer resources, Abso and Reliant are helping them work more efficiently from assessment through hiring and retention," stated David Dickson, Vice President of Market Operations at Abso.
