GSA SCHEDULE ANNOUNCED BY NCODE

U.S. General Services Administration (GSA) Contract Number issued for eDAQ, GlyphWorks, DesignLife, and Infield

Starkville, Mississippi, USA June 23, 2008 – nCode International, a leading developer of data analysis, data acquisition, durability and prognostics solutions, today announced a schedule of software, products and services it can supply to US Federal agencies under the US General Services Administration (GSA) program. nCode has been assigned the contract number, GS-35F-0297U.

The GSA is the US Federal government's procurement organization. The GSA assists other federal agencies in purchasing products and services from suppliers. The new GSA schedule announced by nCode makes it easier for users to purchase from nCode, as nCode and the GSA have agreed up-front pricing, terms and procedures for US governmental purchases.

"The GSA certification will allow US federal customers and agencies to more easily procure nCode's eDAQ data acquisition instruments, GlyphWorks, DesignLife, and Infield data analysis software. Many federal agencies already use nCode products and services and I am pleased that our products and solutions will be more readily available to engineers working on important durability and asset monitoring applications." said Brian Dabell, Executive Vice President, for nCode International.

nCode will be administering its GSA registration from its Advanced Application Center, Starkville, MS, USA. Visit the GSA Schedules e-Library, www.gsaelibrary.gsa.gov, to view nCode's listing on the GSA schedule or see nCode products listed on the GSA Advantage website www.gsaadvantage.gov

About nCode International
nCode is a leading developer of durability, test & measurement, data analysis, asset monitoring, and product design (CAE Durability) solutions. nCode offers a unique combination of data measurement and acquisition instruments, powerful analysis software, and services that help customers eliminate unexpected failures by measuring and converting durability, performance and operational data into information from which business decisions can be made that improve Product Life Performance (PLP). Established in 1982, nCode has direct offices in Europe, North America, and Asia. For more information about nCode, please visit www.ncode.com.

nCode products include: ICE-flow GlyphWorks, Automation, and DesignLife, SoMat eDAQ, and eDAQ-lite. The nCode Logo, nCode, ICE-flow GlyphWorks, ICE-flow Automation, ICE-flow DesignLife, SoMat eDAQ, and eDAQ-lite are trademarks or registered trademarks of nCode International Corporation in the USA and/or other countries.
