GTT Introduces New Patent Valuation Tool

Portland, Oregon (June 26, 2008) - Global Technology Transfer Group, Inc., (GTT), announces the expansion of its patent valuation service. For the first time, GTT is making available its proprietary internal valuation engine and transaction database. GTT's valuation process and resulting analysis leverages its proprietary transaction database and valuation algorithms to reach a real time market valuation. GTT's valuation engine quickly filters and identifies key patents accounting for significant value in a portfolio. Additionally, GTT's valuation engine can be utilized to determine portfolio value appreciation.

"We are very excited to offer use of our proprietary tool sets to support business-critical IP decisions. This offering is in response to direct requests from our clientele who wish to further leverage GTT's valuation competency," explains Michael Lubitz, CEO and Chairman of GTT.

GTT is the leader in comprehensive analysis and statistical patent valuation. GTT offers comprehensive valuation services for patent asset sales and acquisition; value asset identification; annual valuation assessment; litigation support; and alternative funding. Additionally, GTT offers brokerage and acquisition services to its corporate clients on a worldwide basis.

For additional information about this and other portfolio management services, please call +1.503.243.1853 or email GTT at info@gttgrp.com.
