

#### Software Benefits:

- ➔ Meet regulatory compliance
- ➔ Easy to use and easy to deploy
- ➔ Reduce password related overhead
- ➔ Biometric two-factor authentication
- ➔ Preferred method of authentication

## Biometric Authentication made Simple.

Keylogger. Dictionary. Guessing. Brute force. Phishing. Social engineering. Man-in-the-middle. Warehouse. All forms of password attacks! Passwords are the weakest form of authentication. Attempts to make them 'stronger' – longer, multi-character, upper/lower case, system generated, and requiring frequent changes – are unsuccessful. Stronger passwords lead to users writing down their password, increased helpdesk calls and costs. On the other hand, biometric authentication is "the most definitive, real-time tool available". And with Ceelox ID user access credentials cannot be lost, stolen, forgotten or shared.

# Introducing: Ceelox ID

## Biometric Authentication made Simple.

### Why Ceelox ID™

Ceelox ID™ fingerprint authentication dramatically reduces the chance that an unauthorized person could gain access to your personal computer, network or key business applications. User names and passwords can be lost, stolen, forgotten or shared. Ceelox ID™ offers strong authentication and convenient password replacement with the swipe of a finger. Whether you are an enterprise, administrator or user, Ceelox ID™ provides increased security, productivity and compliance.

### Reduce Your Password Related Overhead

With a profound reduction in password related overhead, Ceelox ID™ is the most cost effective way to manage secure user authentication available today. By far the largest category of help desk calls is user name and password related issues. The use of Ceelox ID™ substantially reduces the large number of your help desk calls related to user names and passwords. A lost, stolen or shared password equals lost productivity. In addition, for users with too many websites and applications passwords to remember, Ceelox ID™ offers the ability to push your user name and password credentials to the websites and applications you use every day. Simply save your passwords within Ceelox ID™ login and gain access with your fingerprint. With Ceelox ID™, you can quickly improve productivity while improving your security.

### Ceelox ID™ is Easy to Use and Deploy

Ceelox™ focuses on building powerful, easy to use applications that provide the best customer experience within all levels of your organization. Security solutions should never make the user feel incapable of using them. This is at the core of Ceelox™ solutions. With that in mind, Ceelox solutions offer an intuitive user interface with solution-based flexibility that cannot be rivaled. Ceelox ID™ quickly and easily adds a strong layer of biometric authentication without having to remove or change your existing security infrastructure. Ceelox ID™ Server Edition is highly scalable and supports Windows Active Directory credentialing. Ceelox ID™, when combined with Windows Active Directory, allows users to access any secured location with a Single Sign On (SSO). SSO provides convenience to the user, and eliminates the need for multiple passwords which can be forgotten or lost, consuming costly help desk time. Ceelox ID™ is compatible with all popular laptop computers with an embedded fingerprint sensor. We can provide a scanner if your computer does not have one. Ceelox ID™ is the best biometric software technology.

### Ceelox ID™ is the Preferred Method of Authentication

Recent studies and countless reports reveal the need for stronger security measures. Consumers and businesses of all sizes are replacing less secure, less convenient methods of authentication with biometrics. There was a time when biometrics was too difficult to deploy and too expensive to consider. Those times are gone. In a worldwide survey to study computer security preferences, Unisys found that 66% of users favor biometrics as the method to combat identity theft. A key benefit of Ceelox ID™ is the convenience of not having to remember a long list of passwords and login information. When you increase the speed of identity authentication and combine it with stronger security and convenience, you will quickly see why Ceelox ID™ is the preferred method of authentication today.

#### ID Requirements:

##### Server Edition:

Windows 2000, Windows 2003, Windows XP/ XP Professional, Vista for clients.  
Windows 2000, Windows 2003, Windows XP Professional for server.  
Windows based LAN configuration.  
Compatible fingerprint scanner.  
Professional services required for configuration and deployment.

##### PC Edition:

Windows 2000, Windows 2003, Windows XP/ XP Professional Vista.  
Compatible fingerprint scanner.

#### Other Ceelox Products:

##### Ceelox Vault™

Take your sensitive information with you wherever you go. Portable, fast, drag and drop file and folder encryption and decryption capabilities for your desktop or laptop computer, flash memory drive or portable hard disk drive.

##### Ceelox ID Online™

Secures and manages user access to internet sites or networks using biometric authentication. Fingerprint Enabled Layered Encryption Authentication for Web Sites and Networks.

##### Ceelox SecureMail™

Encrypts email exchanged over a network or internet which includes a simple, easy-to-use Outlook™ plug-in.

*“With biometrics, a person is identified by his or her physical characteristics. No other person in the world has those same characteristics.”*

- John D. Ashcroft

*Former United States Attorney General*
