

# SPEECHTRACK™

RECORD CALLS ANYTIME, ANYWHERE!

## What is SpeechTrack?

SpeechTrack is a Hosted Call Recording Utility that anyone can use from any phone and from anywhere. Customers can then access their recordings on SpeechTrack's secure website at <http://speechtrack.com>. They can add notes to the reporting website so they can keep track of what is what online or they can download the recording to their computer.

SpeechTrack offers two different recording options that allow users to record calls and conversations in a variety of ways. SpeechTrack can either dial an outbound number for the user and record the call, or SpeechTrack can simply start recording the line, which can be used in numerous ways.

The Second option can be used as a Dictation line, allowing you to record your thoughts and statements at anytime. Or, if your phone has speakerphone functionality this option allows SpeechTrack to simply sit on the line and record a face to face interview or live meeting. The Second Option can be used to record inbound calls as well, providing your phone has conference functionality and can bridge a three way call together.

SpeechTrack brings the same Call Recording functionality that Fortune 50 companies have been enjoying for years to everyone. Now you can record a call from any phone, at any time and retrieve it online in no time at all. If you need to record a call, SpeechTrack is the perfect solution for you.

Record calls from anywhere on any phone using SpeechTrack. Access the recordings later from your computer.

If you can get a dial tone, you can record your phone call with SpeechTrack. Start recording today!!!!
