

PowerEasy has been built from the ground up for people who love their Mac's and also want to use them to manage their business. It is an innovative, next generation accounting solution built exclusively for the Mac, keeping the needs of the growing companies in mind.

PowerEasy products enable businesses to manage key financial operations in a single, integrated system, which include; Receivables, Payables, Cash Management, Time & Billing and Distribution. PowerEasy also allows integration with existing Payroll and POS solutions.

With a familiar Apple look and feel, PowerEasy products are so easy to use that virtually anyone, even those with little or no accounting experience, can operate the software.

The screenshot displays the PowerEasy software interface on a Mac. The main window is titled "List of Customers" and contains a table with columns for Customer ID, Customer Name, Group, Preferred Contact, City, State, and Balance. The table lists various customers such as A & J Recreation, Allen Martin, Apple Computer Inc., and Cascade Village Recreational. A sidebar on the left provides navigation for different business areas like Receivables, Payables, Cash Management, and Smart Lists.

Overlaid on the main window is the "Time Tracker" window, which shows a calendar for January 2008. The calendar is used to track time spent on various projects, including "Boardroom", "Remodeling", "Bathroom", and "Renovation". Time entries are shown as colored dots on the calendar grid, with details like "06:36 PM Unass" and "03:33 PM Carpet" visible.

A "Task Slip" window is also overlaid, displaying a large digital clock showing "55:32". Below the clock are "Start" and "Stop" buttons. The window includes fields for "duration", "project" (set to "Remodeling"), "task" (set to "Carpentry"), and a description of the work: "Carpentry work for the client". It also has input fields for "rate/hour" (55.00), "revenue" (0.00), "cost/hour" (10.00), and "cost" (0.00).

## Single Application

PowerEasy Suite is a fully integrated application giving you the power to run your entire business operation using a single application. It comprises of the following:

- Financials – General Ledger, Receivables, Payables, Cash Management and Advanced Financial Reporting
- Service – Time and Billing and a stand alone Time Tracker application
- Distribution – Sales Order processing, Purchase Order processing and Inventory management
- iPhone Exec – gives Real Time visibility into your business, allowing you to view all information from summary to detail
- Remote Server – connect to your server from a remote location using the same client application.
- Administrative Interface – manage Companies, Users, Roles, Database Backup & Revert, schedule automatic backups of database and much more
- Data Migration Tool – import data from different sources including your current accounting applications.
- Payroll – integration with popular Payroll Services
- Customization Tools – Report Writer, Inquiry Designer and Metadata Tool (to customize screens and workflow)

## Getting Started is a Breeze

- PowerEasy Server can be installed in few minutes and the client application can be dragged and dropped.
- Sample company can be used to start exploring the product before any setup is done
- Use wizard based interface to create a new company
- Setup income and expense accounts by selecting from one of 20 different chart of accounts shipped with PowerEasy
