

TechnoCom™

Making Wireless Location Happen®

Exceptional Industry Leaders

Innovative solutions and services for wireless operators, system integrators and government agencies

TechnoCom Corporation® is a leading provider of solutions to enable wireless location networks and assure their ongoing performance. Our wireless location and mobility solutions combined with our expertise in networking and field deployment, consulting and standards make it possible for us to deliver comprehensive solutions and related professional services to wireless operators, service providers, system integrators and government agencies.

Our custom solutions and professional services allow customers to manage their wireless location networks and services, reduce operating and capital costs, deliver superior levels of service, increase productivity and rapidly deploy new revenue-generating services. Our reputation for service, performance and excellence — along with our history of on-time delivery — are the reasons customers select TechnoCom as a long-term business partner.

Founded in 1995, TechnoCom Corporation is a privately-held company with continued growth in year-over-year revenue since its inception. For four consecutive years (2003, 2004, 2005 and 2006), TechnoCom has been named to Deloitte's "Technology Fast 50" program in Los Angeles, a ranking of the 50 fastest-growing technology companies in the area by Deloitte & Touche LLP.

Each of our founders and key employees has made important contributions in wireless and location system engineering over the past two decades — a combination of over 300 years of significant experience in just our top-level team alone. We use our extensive knowledge to engineer effective wireless solutions to deliver business results to our customers and partners.

Products and Services

Increase revenue with location performance products and services

Operator Solutions

TechnoCom is the recognized industry leader in performance management solutions for wireless location networks. Our field-proven platforms and applications enable cost-effective transaction mediation, service quality measurement, performance management and compliance monitoring for E911 and commercial Location-Based Services.

Our LocationAssurance Manager® (LAM) and LocatePredict™ platforms help wireless operators and service providers monitor and optimize the performance of their location networks. These solutions help ensure peak operating performance of the network leading to increased customer satisfaction, reduced expense in manual testing and troubleshooting and compliance with regulatory requirements. We have also successfully deployed location middleware and call-processing platforms that enable the cost-effective integration of location technologies and network elements for the delivery of location services.

Mobility Solutions

TechnoCom's Mobility Solutions business unit provides intelligent software solutions and professional services for the transportation and automotive industries, systems integrators and federal, state and local government agencies. These solutions enable vehicle safety applications and make it possible to transmit traffic and road condition information from every major road within the transportation network.

The Mobility Solutions business unit is a pioneer in the development of Vehicle Infrastructure Integration (VII) and 5.9 GHz Dedicated Short Range Communications (DSRC) networking and management protocols. TechnoCom supports standardization of secure, anonymous communications for the DSRC user.

Our products and professional services are designed for the mobile communications, telematics, vehicle infrastructure integration, DSRC, infotainment, public safety, and perimeter monitoring and airport markets.

Professional Services

For the last ten years TechnoCom has been working with wireless mobile carriers and road infrastructure integrators to bring reliable wireless technology to the market — establishing our reputation for consistency and excellence.

TechnoCom's professional services are tightly coupled with our wireless operator and telematics offerings. Our wide array of services are designed to specifically meet the needs of our customers and include in-depth technical investigations and analyses, detailed designs, engineering plans, recommendations and full-up prototype demonstrations.

- Network Design
- Custom Software Development
- Performance Prediction and Optimization
- Technology Assessment
- Field Deployment Testing
- Standards Support

We offer you a rich choice of ready to launch solutions for location quality of service, network performance management and DSRC data technologies.

Our professional services and business solutions are based on TechnoCom's more than 10 years of providing wireless location solutions and services to network operators, service providers, system integrators and government agencies.
