Easy Guide to Product Identification Codes

PRODUCT IDENTIFICATION CODE

Listed in the catalog according to size and shape by Series:

- 4R** = **4 1/2" Round**
- 4x4** = **4 1/2" by 4 1/2" Square**
- 6R** = **6" Round**
- 6x6** = **6" by 6" Square**
- SFA** = **Single gang Full-Active**
- SPB** = **Single gang Push Button**
- AA** = **All-Active**
- NS** = **Narrow Style**
- BPS SM** = **Bollard Post Square Surface Mount**
- BPS IG** = **Bollard Post Square In Ground**
- BPR SM** = **Bollard Post Round Surface Mount**
- BPR IG** = **Bollard Post Round In Ground**

LEGEND IDENTIFICATION CODE

ALL SHAPES AND SIZES OF SWITCH FOLLOW THIS NUMBERING CODE.

Standard (STD) switches are debossed and infilled with color (in stock).

Non-standard switches will be debossed and infilled OR engraved and infilled, depending on quantity ordered (not stocked).

- 10**=PUSH TO OPEN DOOR (black infill)
- 11**=PUSH TO EXIT (black infill)
STD in 4" Round only

GENERAL SWITCH INFORMATION

All AccessAbility™ switches are compatible with major manufacturer's brands of low-energy automatic door operators.

FEATURES	BENEFITS
High quality snap action micro-switches that actuate with minimum 2 lbs. of force.	Durable and responsive; AccessAbility™ switches exceed ADA, DDA and CSA guidelines.
Micro-switch is single pole, double throw (SPDT) and rated at 15 amp, 125/250VAC CSA and UL® listed: meets UL® 1054 endurance requirements for electrical life.	Meets connectivity requirements for low-energy automatic operators. 30+ years of proven dependability in high traffic entrances, in a variety of North American weather conditions.
Standard coverplates are 18 gauge type 304 Stainless Steel.	Exceptionally durable, easily maintained.
Superior craftsmanship in the debossing, engraving and infill coloration processes.	Classic nomenclature with long lasting and crisp detail, whether in logo, image or text.
AccessAbility™ switches (size dependent) are compatible with a combination of 1-Gang, 2-Gang or 4x4 junction box mounting preps.	Offers versatility of installation at existing jobsite conditions.
Every AccessAbility™ switch comes complete with hex wrenches, quick-connect wiring and the basic mounting components.	Cost-saving and trouble-free installations.
Switches in flush mount applications have a low projection profile from mounting surface.	Unobtrusive looks and snag deterrence.
Readily accepts hard-wire and wireless energization.	AccessAbility™ transmitters connect to existing micro-switch terminals.
Midwestern manufacturing and warehouse facility.	Timely and cost-saving shipping to all US destinations, including international exporters.
Manufactured in the U.S.A.	Wikk Industries, Inc. supports the American economy.

OPTIONS

- Decorative materials and finishes
- Custom engraving - logo, image or text
- Custom infill coloration
- Braille lettering
- Weather and dirt resistant protection
- Double Pole Double throw (DPDT) micro-switch for dual operations
- Quick-connect wireless (RF) operation (see page 16)
- Pneumatic operation, including fail-safe exit

The **INGRESS'R**®

A 36" pillar of **AccessAbility.**

for all
pedestrian
traffic

The INGRESS'R's contoured profile allows activation from literally any approach and height level.

ingress\`in-gres\` *n*: 1. the act of entering 2. the power or liberty of entrance or access

Wikk Industries brings you
"THE POWER OF ENTRANCE"
with the innovative

INGRESS'R®

36" tall X 6" wide X 1 1/2" deep

A 36" Column of
Touch Activation

A New Direction. . .

Made in the USA

For technical information: consult the Wikk AccessAbility™ product binder, www.wikk.com or call 877-421-9490

36" Column of Touch Activation The INGRESS'R®

Is it possible to unite Architectural Integrity with ADA compliance? It's not only possible, but beautifully achievable with the INGRESS'R® by Wikk Industries, Inc.

Features and Benefits

SLEEK TAPERED PROFILE

- Deflects impact from wheeled carts and conveyances
- Naturally directs movement towards central activation column
- No squared-off edges to get caught on
- Offers vandal deterrence: no gaps or edges to pry; ABS cap is secured by spanner screws
- Weather resistant: no gaps for water or ice to penetrate

36" TALL x 6" WIDE x 1 1/2" DEEP

(914 mm x 152 mm x 38 mm)

- Surface mounts onto walls – including uneven surfaces
- Fits precisely on commercial 6" x 6" bollard post when wall mounting is impractical

BASE DESIGN & FACTORY-INSTALLED WIRING HARNESS PROVIDE FLEXIBLE ENERGIZING OPTIONS

- 2 points of hard-wiring access from flush junction boxes
- 4" x 2" x 1/2" space provided beneath the ABS cap for RF transmitter; simply connect to harness

RUGGED, YET SENSITIVE

- Dependable micro-switch: 15 amp, 125/250VAC, UL® & CSA listed
- Sturdy, 1/8" extrusion (nominal) with superior finishes
- Actuates from literally all points on the activation column

STANDARD MODELS STOCKED FOR QUICK DELIVERY

- Clear Anodized Aluminum with blue wheelchair logo (model I36-5 Clear) & with added text "PUSH TO OPEN" (model I36-3 Clear)
- Dark Bronze Anodized Aluminum with white wheelchair logo (model I36-5 Dk Bz) & with added text "PUSH TO OPEN" (model I36-3 Dk Bz)
- Models without logo are available, as well as other finishes and materials

WIRELESS

SQUARE BOLLARDS

FEATURES	BENEFITS
• 6" [152 mm] square	• Commercial durability • Ample surface for multiple devices
• Black mortised cap in textured HDPE (High-Density Polyethylene)	• Removable with tamper-resistant fastenings • Factory installed concealed transmitter mount for unobstructed wave transmission (use Boltran)
• Switches and devices mount directly to bollard prep	• No electrical box needed • Fast installation time
• 1-gang prep at 36" [914 mm] from finished floor	• Accepts all switch sizes (except narrow style) • Meets current US ADA codes
<p>Standard architectural materials and finishes within 3 types:</p> <p>Aluminum: extruded; nominal 5/32" [4 mm] wall thickness, 1/64 corner radius</p> <ul style="list-style-type: none"> • Superior anodized finishes and durable good looks to complement standard architectural openings • Tight corner radius • Standard models normally stocked for same day shipping <p>Tube Stainless Steel: Welded type 304; .120 [3 mm] wall thickness, 3/16 corner radius</p> <ul style="list-style-type: none"> • Exceptionally sturdy in 2 decorative finishes to complement prestigious architectural openings • Stands up to heavy use in high-traffic areas • Softened corner radius • Materials stocked for average 1-2 week turn-around <p>Brass Clad Aluminum: nominal 18/19 gauge sheet metal over standard Aluminum extrusion, 9/64 corner radius</p> <ul style="list-style-type: none"> • Decorative Brass finishes to complement prestigious architectural openings • Materials stocked for average 2-3 week turn-around 	

- OPTIONS** – Customizable to address practical applications such as access control and security, to achieve a more distinctive look, or to preserve architectural integrity.
- Height
 - No prep – for shop or jobsite preparation
 - Special Preps for access control or other devices
 - Card reader
 - Proximity reader
 - Speaker
 - Multiple preps for additional devices
 - Metal caps in Stainless and Brass (recommended for Clad and Tube Stainless Steel types only)
 - Removable for access to wiring (Tube Stainless Steel and Brass Clad only)
 - Welded and polished for aesthetics and vandal-resistance (Tube Stainless Steel type only)
 - Welded caps can be flat or angled

STANDARD MODELS

Commercial height at 42" [1067 mm] from finished floor

SURFACE MOUNT – Includes superior concealed anchoring base, mounting hardware and instructions.

IN-GROUND – 54" [1372 mm] overall height; provides 12" [305 mm] recess below grade.

4x4 Edge US32D **NEW!**

4 11/16" tall X 4 7/8" wide X 1/2" deep (118 x 124 x 8 mm)

Sturdy 3-sided stainless shroud protects the switch components from harsh environmental conditions and washdown chemicals. Especially effective against freezing rain and snow infiltration to prevent temporary ice buildup. Offers a decorative appeal by concealing the gap between the faceplate and backplate of the switch.

SHOWN WITH SWITCH (Sold separately)

Insert between the bollard and backplate of the switch. Recommended for exterior bollards.

Hard-Wire and Wireless 

Bollard Cap

Square shown; same features in round.

See page 16 for wireless products. (BOLTRAN series)

TUBE STAINLESS STEEL
Finish: US32D Satin
Also available US32 Mirror (Shown with 4 x 4 Edge)

ALUMINUM
Finish: Black
Also available in Clear Dark Bronze

ALUMINUM
Finish: Light Bronze
Also available in Clear Dark Bronze

CLAD ALUMINUM
Finish: US4 Satin Brass
Also available in US3 Mirror Brass

"Best Bollards"

ROUND BOLLARDS

OPTIONS – Customizable to address practical applications such as access control and security, to achieve a more distinctive look, or to preserve architectural integrity.

- Height
- Multiple preps for additional switches
- 1-Gang Adapter Cuff (BP 4x4 ADT RF BLK) to mount a flat device to 6" radius and to allow RF transmission with a metal cap (description below)
 - Switch
 - Card reader
 - Proximity reader
- Metal Caps in Stainless Steel
 - Welded and polished (Mill Aluminum & Tube Stainless Steel only)
- Domed Cap - welded and polished (Mill Aluminum for paint by others and Tube Stainless Steel types only)
 - Prevents litter & misuse and adds architectural interest
 - Surface Mount: 45" height [1143 mm]
 - In-Ground: 57" [1448 mm] overall height provides 12" [305 mm] recess below grade

FEATURES	BENEFITS
• 6" [152 mm] diameter	<ul style="list-style-type: none"> • Commercial durability • Ample surface to mount various devices (with 1-Gang Adapter Cuff; description below)
• Black mortised cap in textured HDPE (High-Density Polyethylene)	<ul style="list-style-type: none"> • Removable with tamper-resistant fastenings • Factory installed concealed transmitter mount for unobstructed wave transmission (use Boltran)
• Impressive curved switch (6C series) mounts directly to 1-gang prep (description below)	<ul style="list-style-type: none"> • No electrical box needed • Fast installation time
• 1-gang prep at 36" [914 mm] from finished floor	<ul style="list-style-type: none"> • Meets current US ADA codes

Standard architectural materials and finishes within 2 types:

Aluminum: extruded; nominal 5/32" [4 mm] wall thickness

- Superior anodized finishes and durable good looks to complement standard architectural openings
- Surface mount models stocked for same-day shipping

Tube Stainless Steel: Welded type 304; .120 [3 mm] wall thickness

- Exceptionally sturdy in 2 decorative finishes to complement prestigious architectural openings
- Stands up to heavy use in high-traffic areas
- Materials stocked for average 1-2 week turn-around

STANDARD MODELS

Commercial height at 42" [1067 mm] from finished floor

SURFACE MOUNT – 42" [1067 mm] Includes superior concealed anchoring base, mounting hardware and instructions

IN-GROUND – 54" [1372 mm] overall height; provides 12" [305 mm] recess below grade

For paint by others
(Shown painted and with dome)

1-Gang Adapter Cuff

Part# BP 4x4 ADT RF BLK

- Sturdy, textured black ABS material
- Multi-purpose use
 - A mounting bridge between a flat device and round bollard (card/ proximity reader, switch, etc.)
 - Allows RF transmission when metal bollard cap is utilized
 - Alternative to 6C series switch
- Cuff mounts onto bollard 1-gang prep. Device mounts directly to 1-gang face prep of cuff.
- 1-5/8" [41 mm] profile, not including device
- 4-1/2" x 4-1/2" [114 x 114 mm] O.D.
- Available in Stainless Steel

Wikk AccessAbility™ Exclusive!

Curved Switch for Round Bollard

6C Series

- A dramatic look with high visibility
- 6" x 6" (152 x 152 mm)
- Heavy-duty 1/8" (3 mm) thick material
- Radius conforms to bollard design
- Standard finish is US32D
- Weather resistant
- OPTIONS:**
 - Finishes: US32, US4, US3, US10B
 - Custom engraving

Switch and Surface Box Compatibility Chart

- All AccessAbility™ switches are ready for hard-wiring to flush mounted electrical junction boxes.
- Surface mounts address alternate design, energizing, visibility and safety requirements that may be present at the jobsite.
- Individual surface mounts are listed on the switch product pages with which they correspond.
- Full descriptions are listed on the product pages.
- The red asterisk (*) denotes that the mount is RF (Radio Frequency) compatible. See legend below for details.

Installation experts drill a small “weep hole” into the underside of non-metallic mounts for moisture evaporation in exterior applications.

MISCELLANEOUS WIKK PRODUCTS

Alternate SWITCHING ACCESSORIES

SEQUENCE & LOCK RELAY

Part# SEQ. & LOCK RELAY

This device is used between the actuating switch and the door operator to create a momentary delay, allowing an electric strike or electric panic device to release before the door begins to open. Also can be used as a hard-wire vestibule sequencer.

1³/₄" L x 2¹/₂" W x 1" H

ALTERNATE ACTION RELAY

Part# ALT ACT'N RELAY

This device is an impulse relay used to change the normal momentary action of a wall switch to maintained, for "Push to Open" and "Push to Close" door operator activation.

1⁷/₈" L x 1⁵/₈" W x 2⁷/₈" H

Installation TOOLS

These hex wrenches have an ergonomic 3-sided handle for a comfortable grip, and are used to install AccessAbility™ switches to junction boxes and surface mounts. One tool is included with every 20 switches ordered, and are also available for purchase.

Part# PT-5/64 - (blue) used to mount switch to 1 & 2 gang configurations using a 6-32 screw

Part# PT-3/32 - (white) used to mount 6" switches to 4x4 configurations using an 8-32 screw

SHOWN WITH SWITCH
(Sold separately)

WKS-4 US32D

7¹/₄" Radius (184 mm) 1¹/₄" overall height (30 mm)
1" Inside Depth (25 mm)

Highly functional as it is decorative, this escutcheon offers a distinctive and tamper-resistant presence for the switch. The wall hugging, slanted contour prevents snagging and shear-off from hand-propelled vehicles. Available in the same materials and finishes as AccessAbility™ switches. **Hard-Wire only**

WKS-4 RF

7⁷/₈" Radius (200 mm) 1⁹/₁₆" overall height (40 mm)
1²⁵/₆₄" Inside Depth (35.5 mm)

A Wik-scutcheon in Radio Frequency (RF) transparent material. The same design and functionality as our metal escutcheon, but manufactured in textured, durable black ABS. This is an economical alternative with another advantage: wireless transmission. Features a rubber seal and caulking groove on the reverse side and a transmitter pocket. Can be painted to match décor. **Hard-Wire and Wireless**

WKS-4RFWR and N4WR Weather Resistant Gaskets

Provide a self-sealing barrier from moisture or dirt entering cavity of mounts. Use in high infiltration conditions.

N4RS (surface mounted)

5" Radius X 2¹/₈" O.D. (127 X 55 mm)
1⁷/₈" Inside Depth (48 mm)

4R switch sets flush within this good-looking, durable ABS enclosure, ensuring a high degree of tamper-resistance. 2¹/₈" (54mm) projection offers a distinctive presence. **Hard-Wire and Wireless**

N4RF (flush mounted)

5⁷/₈" (149 mm) overall radius with trim ring
1⁷/₈" Inside Depth (48 mm)

Same material and qualities as N4RS, but designed for mounting flush into wall. Features a molded-in 7⁸/₁₆" (22 mm) wide trim ring and aluminum mounting bracket. **Hard-Wire or Wireless if mounted into RF-transparent wall materials**

2x4 BOX SLEEVE

2³/₄" X 4¹/₄" X 1⁵/₈" O.D. (57 X 108 X 41 mm)
1⁵/₈" Inside Depth (38 mm)

Mount a standard 1-gang junction box to wall and slip this sturdy surround over it to give a high profile, decorative presence to the switch. Available in the same materials and finishes as AccessAbility™ switches. 3³/₃₂" (2.38 mm) corner radius. **Hard-Wire only**

SURF 4R

2³/₄" X 4¹/₂" X 1¹¹/₁₆" O.D. (70 X 114 X 43 mm)
1⁹/₁₆" Inside Depth (40 mm)

Brown phenolic box with corner-covering aluminum adapter plate to present a finished look. Micro-transmitter (SWTRAN-M series) fits neatly into mount. **Hard-Wire and Wireless**

4x4 BOX SLEEVE
4 1/4" X 4 1/4" X 1 5/8" O.D. (108 X 108 X 41 mm)
1 5/8" Inside Depth (38 mm)

Mount a standard 4x4 junction box to wall and slip this sturdy surround over it to give a high profile, decorative presence to the switch. Available in the same materials and finishes as AccessAbility™ switches. 3/32" (2.38 mm) corner radius.
Hard-Wire only

SURF 6/M
4" X 4" X 3/4" O.D. (102 X 102 X 19 mm)
3/4" Inside Depth. (19 mm)

Clear or dark bronze anodized aluminum ring surrounds galvanized mounting plate to create an attractive surface mount. 2-piece unit. **Hard-Wire only**

6x6 Series switches mount directly onto 1-gang prep of standard Wikk bollards.
(See page 4 for square bollard details.)

See page 1

6R SERIES DOOR SWITCHES

6R Series Surface Mounts

Wik-Scutcheons **A WIKK EXCLUSIVE!**

WKS-6 US32D

9 1/2" Radius (241 mm) 1" overall height (25 mm)
7/8" Inside Depth (22 mm)

Highly functional as it is decorative, this escutcheon offers a distinctive and tamper-resistant presence for the switch. The wall-hugging, slanted contour prevents snagging and shear-off from hand-propelled vehicles. Available in the same materials and finishes as AccessAbility™ switches. **Hard-Wire only**

SURF 6R

4 1/2" X 4 1/2" X 1 3/4" O.D. (114 X 114 X 44 mm)
1 1/2" Inside Depth (38 mm)

Surf SQ 4 & 6 BLK black ABS box with aluminum corner-covering adapter plate to present a finished appearance. Features a unique battery change-out compartment. Battery can be exchanged without switch removal. Tamper resistant: compartment door is held in place by the switch and cannot be removed or lost. **Hard-Wire and Wireless**

N6RS (surface mounted)

6 1/8" Radius (164 mm) 2 1/8" O.D. (54 mm)
1 7/8" Inside Depth (48 mm)

6R switch sets flush within this good-looking, durable ABS enclosure, ensuring a high degree of tamper-resistance. 2 1/8" (54 mm) projection offers a distinctive presence. **Hard-Wire and Wireless**

N6RF (flush mounted)

7 3/4" (197 mm) overall radius with trim ring
1 7/8" Inside Depth (48 mm)

Same material and qualities as N6RS, but designed for mounting flush into wall. Features a molded-in 7/8" (22 mm) wide trim ring and aluminum mounting bracket. **Hard-Wire or Wireless if mounted into RF-transparent wall materials**

N6WR Weather Resistant Gasket

Provide a self-sealing barrier from moisture and dirt entering cavity of mounts. Use in high infiltration conditions.

SINGLE GANG SWITCHES

NARROW

FEATURES:

- Fits all single gang (2 x 4) flush electrical boxes
- Use SURF SFA mount for surface or wireless applications
- Mount directly onto Wikk Square Bollards
- Decorative Material and Finishes available (see pg. 7)

OPTIONS: (SFA Series ONLY)

- Custom engraving upon request
- Weather resistant capability
- 2 pole, Double Throw (D.P.D.T.)
- Wikk Wireless remote operation

FEATURES:

- Designed to flush mount directly into narrow jambs; no junction box needed
- Self-adhesive mounting cutout and drill/tap template included
- Requires custom bollard prep

SFA Series

2 3/4" x 4 1/2" (70 x 114mm)

SURF 4/M

4 X 4 X $1\frac{1}{8}"$ O.D. (102 X 102 X 29 mm)
 $1\frac{1}{8}"$ Inside Depth (29 mm)

Clear or Dark Bronze anodized aluminum ring surrounds galvanized mounting plate to create an attractive surface mount. 2-piece unit.

Add Remote Control Versatility to AccessAbility™ Products

The Multi-Code brand is synonymous with superior, ultra-reliable radio controls used in new construction and the retrofit/replacement market. Wikk carries a variety of styles and sizes to accommodate most installation and end-user requirements, including hand-operated and switch-operated models. The switch-operated controls are pre-wired for quick installation, and modified with impulse-capturing components to extend the time of signal transmission. The products are available in 300 MHz and Stanley-compatible 310 MHz, and offer 1,024 codes with 10 dip switches per channel.

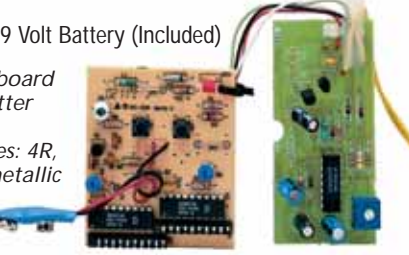

Switch operated models require a non-metallic surface box, denoted in this brochure by this symbol

CUSTOMIZATION

AccessAbility™ switches are available in a variety of 11 separate legends, yet your project may require a more distinctive look whether to ensure architectural integrity or to address a more practical application such as access control and security.

Wikk Industries, Inc. is known for designing and manufacturing customized switch covers and bollard posts – and delivering them in a timely fashion.

Satin Stainless Steel (US32D) switch covers are standard in our product line. They are also available in these decorative finishes: Mirror Stainless Steel (US32), Satin Brass (US4), Mirror Brass (US3), Oil-rubbed and relieved Oxidized Brass (US10B). See page 7.

We look forward to the challenge of creating your special switch, whether it requires a distinctive finish, logo, image, text or simply a different infill color!

These are a sampling of the custom requirements we have manufactured:

Count on Wikk to fulfill your project requirements!

Bollard posts can be made with multiple preps for mounting access controls, speakers, control panels and the like. Other options are: custom heights, caps and finishes. See pages 4 & 5.

COMPANY HISTORY and COMMITMENT

3 Generations of Innovative Manufacturing Excellence

The Wikkerink name has been known and respected in the door industry for well over 50 years, beginning with Lee Wikkerink and his father Lance, who worked together in several major automatic door manufacturing firms before starting their own company.

In 1980, Lee Wikkerink formed Wikk Industries, Inc. to advance a balanced door hardware product line, which evolved into an improved balanced door system branded *Excel*. Behind the scenes however, Lee also developed a line of automatic door carpet controls and what would become the industry standard of "Knowing Act" automatic door devices, commonly referred to as switches. By 1984, daughters Glenda Horn and Lori Bedard were working with Lee in research, refinement and production of the switch line.

When the Americans with Disabilities Act (ADA) formally passed in 1991, Wikk was prepared with a comprehensive selection of switches, mounts & accessories and had become known as an innovative, responsive and reliable manufacturer. In 1996 the entire product line was trademarked AccessAbility™.

In the last decade, the face of the Company changed in response to market trends. The carpet controls were sold, the balanced doors ceased, and the Company now concentrates on all facets of AccessAbility™, and provides replacement parts to support Wikk balanced doors in the field.

Today, Lori and Glenda enthusiastically co-own and direct the Company, expanding AccessAbility™ in response to the design, installation and security challenges faced by Architects, contractors and property owners - and to enhance access to people of all abilities. Although Lee is no longer active in the business, he participates as mentor and consultant.

The unrelenting demands of the industry inspire our dedication to provide exceptional, American-made automatic door activation products. You can rely on Wikk's friendly and experienced staff to assist in your selection of attractive, durable and reliable products that you can confidently include in your projects.

Call on us, we are at your service!
