RxSavings-Center - Online Guide and Tutorial

What's this all about?

We designed our [Rx-Savings Finder](#) tool to help people like you search for the best prices on prescription drugs. Use RxSavings-Finder to find out whether your prescription drugs are covered by one or more discount drug program at local retailers.

Not sure how to use our [Rx-Savings Finder](#) tool?

No Problem!Our discount prescription drug information can be used in a number of different ways (including with the RxSavings-Finder).

- If you want to just search for the discount drug plans for a certain prescription drug, you can just browse alphabetically by drug name.
- If you wish, you can also browse through several lists of popular medications to find the name of your prescription drug.
- If you want, you can also search through the complete list of discounted drugs offered by a specific retailer in your area. We also have a list of all medications that are offered in at least one retailer's discount drug program.
- We also allow you to browse through the medications that are sorted by drug usage categories, such as "Arthritis and Pain" or "Heart Health and Blood Pressure"
- Finally, more advanced users can also search through different drug usage categories, and at the same time, compare up to four discount drug programs with our RxSavings-Finder.

The RxSavings-Center is Free to Everyone and your Private Information Is Never Shared

The RxSavings Center and the RxSavings-Finder are available to all people at no cost. We originally designed the RxSavings Center to help the millions of Medicare beneficiaries who have reached the donut hole or coverage gap portion of their Medicare Part D prescription drug plan. However, the RxSavings Center can be used by anyone who wishes to get an overview of national or regional retail discount drug programs. If you have any suggestions of other discount drug programs, [please click here to let us know](#).

Please note your privacy is important to us and we do not share or sell any of your private information with other people.

[:: Top](#)

Next ... Choose how you wish to search through the discount drug programs.

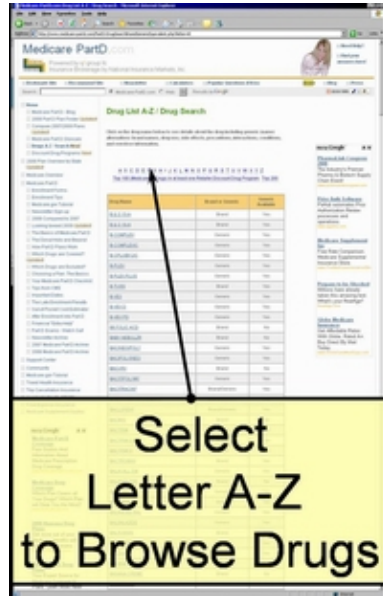

After choosing the "RxSavings Center" link from the Medicare-PartD.com navigation you will find a listing of all the different ways that you can search the discount drug plans and how to use the RxSavings-Finder tool.

As noted above, there are a number of different ways to search through the discount drug programs.

- The simplest way to search may be for you to browse, alphabetically for the name of your medication. If you choose a letter and do not find your medication in the list of drugs, you may want to check the spelling of the drug or, perhaps your medication is not covered by a discount medication program. If the drug is highlighted in orange in the alphabetical listing, the drug is covered under one or more drug discount programs. Click on the medication name if you wish to see more details and which discount drug programs include this medication.
- We also have medications organized into several lists of popular medications. Click on one of the lists and you will find the medication organized alphabetically. If you do not find your medication in one of these lists, you may wish to try the alphabetical search. Click on the medication name for more details.
- You may want to browse all of the medications available from a particular retailer or retail drug discount program. Just click on the retailer who is offering the discount drug program and you can browse alphabetically through the available medications. also search through the complete list of discounted drugs offered by one or more retailers in your area. Click on the medication for more details.
- You can also browse for your medications through drug usage categories. Drugs are organized by the retail discount drug program into such categories as "Arthritis and

Pain" or "Heart Health and Blood Pressure" or "Woman's Health". Again, you can click on the medication name for more details.

- Finally, we have RxSavings-Finder, an advanced search for users to select one or more drug usage categories offered by different discount drug programs. Drugs are listed with prices of up to four discount drug programs. You can click on the medication name or on the name of the discount drug program for more details.

The Alphabetical Drug Search

The first and simplest way to browse the discount drug plans alphabetically by the name of your medication.

Take a browse through the prescription drugs under your chosen letter. If you find your medication in our alphabetical listing and the name of the drug is color-highlighted orange and there is an "*" by the drug name, then it is included in one or more discount drug program. For example, if you [click here you will see the medications that start with the letter "C"](#) and see a few drugs that are covered under discount drug plans. You can click on the medication name and view more details on the medication.

We have drugs listed under each letter of the alphabet. So if a certain letter (for example, the letter "I") does not have any underlines, it simply is a browser error - there are currently drugs filed alphabetically under this letter.

[:: Top](#)

Example of Searching for the drug Potassium Chloride

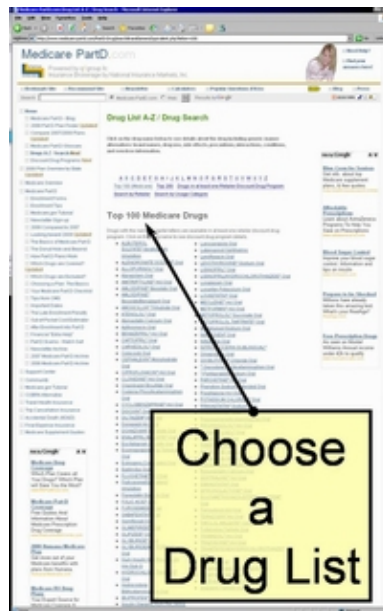

First, you need to click on the first letter of this drug. So we will [click on the letter "P"](#). Now you will see a list of all the drugs that begin with the letter "P". If a particular drug is highlighted orange and has an "*", then this drug is covered under one or more discount drug plans.

When we use our mouse to scroll down to the drug "Potassium Chloride", we see that it is highlighted orange and has an "*". We need only click on the name of the drug and see the details of the discount drug plan or plans. You can [click here for an example of the discount coverage of "Potassium Chloride"](#).

You will notice that this drug is covered under several different discount drug programs including those provided by Krogers, Kmart, Wal-Mart, Walgreens, Target, Giant Eagle (from different states), and Schnucks.

The detail shows the retailer's name, the cost for the medication, the strengths and form of the medication, and the drug usage category used by this retailer.

[:: Top](#)

Finding your Medications on a Popular Drug List

If you are not sure where to begin, another good starting point is to just browse through the medications found on several lists of popular medications.

As you can see in the graphic to the left, you can just click on the list links to see a complete the prescription drugs included on this list. Once you have found your medication, just click on the drug name and you can see if the medication is included in one or more drug discount programs. Examples of drug lists include the "Top 200 Drugs List" or the "Top 100 Medicare

Searching Through a List of Drugs included in one or more Drug Discount Programs

A favorite way to search for people who know where they wish to shop is to simply search through a list of drugs included in one or more Drug Discount Programs or search the drug list of a specific retailer's drug discount program.

Once you are in one of the lists, the prescription drugs are listed alphabetically within the retailer's drug usage category. At any time, you can click on a drug name for more information.

[:: Top](#)

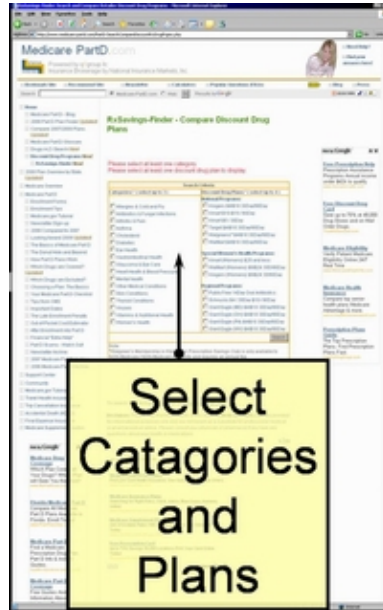

Drug Usage List

Searching Through a Drug Usage Category

Another way to search for discounted prescription drugs is by browsing through the different retailers' Drug Usage Categories.

As we note in the "RxSavings Center", the Drug Usage Categories are a convenience provided by the retail discount drug programs. Drug Usage Categories may not duplicate pharmaceutical drug classes or categories. If you have any questions about your prescription drug classification, please consult your pharmacist or physician.

[:: Top](#)

The RxSavings-Finder Search and Comparison Tool

If you decide to compare different retail plans in your area by drug category, then you may want to use the more advanced features of our RxSavings-Finder. First, let's follow some steps Where to begin?

The RxSavings-Finder requires that you select up to 3 drug usage categories and up to 4 retailer discount prescription drug programs to compare. You choose your categories and programs by clicking in the box to the left of the desired category/program.

Now click the "search" button below the programs. A chart will appear with the discount programs across the top and the prescription drugs, sorted alphabetically within category down the side. The word "Yes" will appear across from the drug name, under each program which covers that particular drug.

To review program details such as pricing, drug strengths, drug form, and any program stipulations, click on the drug name. You will be taken to a detail page for this particular drug.

which shows all of the details for every retailer discount prescription drug program which is currently in our database.

The drug detail page also contains a link to more drug details such as drug interactions, side effects, and alternatives.
