

METTLER TOLEDO

StarterPac Installation Documentation

COLUMBUS, Ohio (October 2, 2008) -- METTLER TOLEDO introduces StarterPac with all installations of industrial weighing equipment. StarterPac Installation Documentation provides a complete record of a weighing system's installation data for a customer's quality system.

As part of every installation, a factory trained METTLER TOLEDO technician will complete a StarterPac Installation Report. This report features device information, environmental parameters, as well as initial calibration data. StarterPac is the newest example of the many value-added services that METTLER TOLEDO provides to its customers using our professional installation program.

Global Service Network

As the global leader in the weighing industry, the METTLER TOLEDO service network guarantees quick response times and fast availability of spare parts. Our global service network provides competent support to you.

METTLER TOLEDO is a leading global supplier of precision instruments and is the world's largest manufacturer and marketer of weighing instruments for use in laboratory, industrial and food retailing applications. METTLER TOLEDO provides weighing solutions that help customers by automating processes, increasing yields, controlling product quality and complying with industry standards and regulations.
