### Process Flow

This is a great opportunity for MYOB consultants to go back to your customers and find out how they are tracking their time and expenses on projects. TimeSolv® provides industry specific solutions for Attorneys, IT Professionals, Management Consultants, and Architects.

The benefit of using TimeSolv® is quick setup that can be completed in less than a day without requiring installs. The users can track their time from any place and at any time with or without access to the internet. Data from TimeSolv® is easily imported into MYOB AccountEdge for accounting.

## Overview

- *Makes timekeeping, billing and project management convenient for small to medium-sized firms*
- *Industry specific Solutions*
- *Eliminates costs associated with internally hosted and administered systems*
- *Provides anywhere online and offline access*
- *Never needs installs for upgrades or internal backups*
- *Proven since 2000*

Take the drudgery out of managing professional services practices with TimeSolv® – the proven software solutions since 2000 for small to medium-sized professional services firms to quickly establish billing and time and expense tracking for clients and projects. Offered as a hosted Internet solution, TimeSolv® provides the fastest way to be up and running.

## Big-Firm Functionality for Small to Medium-Sized Firms

TimeSolv's online solutions are subscription-based providing billing and project management functionality typically used by the larger firms. Solutions include TimeSolv® Plus and TimeSolv® Legal for time and billing management and WorkSolv for integrated project management.

Features include:

- Client and Project Setup
- Invoices and Payments
- Time and Expense Entry
- Project Management Tools
- Billing with Multiple, Flexible Formats
- On demand and scheduled financial reports

## Solutions Highlights

- **Low startup costs for immediate productivity** – There are no set-up costs or implementation fees. The only requirements for operation are a personal computer with a browser and access to the Internet.
- **No system administration fees** – All backups, updates, and hardware are maintained by TimeSolv® Corporation.
- **Ease of use** – Applications are streamlined and intuitive so users can quickly come up to speed with minimal expense.
- **Online training** – Full access to customer support at no charge including in person and self paced training.
- **Offline synchronization** – TimeSolv® includes TimeSync®, a MS Windows application that allows time and expenses to be entered when a user is unable to get on the Web.
- **PC and Mac Compatible**

## TimeSolv® Plus and TimeSolv® Legal

- *Comprehensive tracking of time and expenses*
- *Ability to enter information Online and Offline*
- *Approval by clients and managers*
- *On demand and automated reports to monitor your business*
- *Robust access control*

### ONLINE TIME AND BILLING Solution

#### Time and Expense Management Made Simple

Tracking and managing time and expenses for billable professionals is a critical yet difficult task. Since TimeSolv® provides online solutions, it simplifies the process of capturing information by allowing time and expense information to be input from anywhere in the world, any time of the day. Employees and subcontractors can opt to either enter time manually or utilize automatic timers that measure time spent on any given task. Both hourly and project-fee billing methods are fully supported.

By providing a timely and accurate method of entering time and expense information, TimeSolv® helps speed up the billing and collections process. TimeSolv® can be used in conjunction with WorkSolv, the integrated online project management solution, which provides the ability to trigger billing by milestones or percentage of project completion.

#### Multiple Billing Delivery Methods Serve Client Needs

With TimeSolv® you can satisfy the needs of the widest range of client billing preferences. Invoices can be delivered via:

- **Printer** – Bills can be printed and mailed by in-house staff.
- **Email** – Invoices can be included within an email message or sent as an attachment.
- **Auto-mail** – For an additional charge, invoices are mailed by TimeSolv® Corporation.
- **Web-bill** – Bills can be viewed online by clients through a secure login. When opting for this service, clients receive email notification of new or outstanding bills. Web-bill also allows for online payment of bills using PayPal, an online payment service that is fully integrated with TimeSolv.
- **LEDES** (Legal Electronic Data Exchange Standard) format for law firms and their corporate clients.

## WorkSolv<sup>®</sup>

- *Effective control of project budgets and resources*
- *Milestone as well as time and material billing*

### ONLINE PROJECT MANAGEMENT SOLUTION

The ability to manage multiple and complex tasks is critical to the success of any professional services engagement. A fully integrated companion solution to TimeSolv<sup>®</sup> Plus online time and billing application, WorkSolv provides comprehensive project management. With WorkSolv, entire team can effectively manage projects from multiple locations. And because WorkSolv is online, WorkSolv is easy to implement and use. You can immediately put the features of WorkSolv to work without the expense or administration of an in-house system.

#### WorkSolv Project Management Capabilities

WorkSolv incorporates a variety of project management and collaboration features, including:

- “Project Roles” for controlling access and categorizing users according to their job function.
- Online viewing of project status and progress information.
- Multiple views, including calendar, outline and Gantt chart.
- Automatic email notifications regarding project status changes.

### Seamless Integration with TimeSolv<sup>®</sup> Plus – A Complete Solutions Approach

Because WorkSolv is seamlessly integrated with TimeSolv<sup>®</sup> Plus, users have an online view of project management as well as billing and collections information from a single login ID. Activities that incorporate usage of both applications include:

- Creation of budgets and tracking of billings against budgets.
- Project status, such as unbilled time and expenses, billings, collections and other relevant financial data.
- Milestone based billing for billing based upon percentage of completion or achieving milestones.
- Assignment of specific personnel to a task.
- Control of rate structures for individual projects or structuring billing rates by timekeeper or activity.

### A Solution for Today's Professional Services Provider

Automating a small firm with a traditional in-house system can be expensive, time consuming and a burden on resources needed for pursuing the true goals of the practice. TimeSolv<sup>®</sup> Corporation offers an easy and cost-effective method of managing time/billing information and project management data in a secure, online environment.
