GotWebHost.com Introduces New Shared IP SEO Web Hosting Plans

Valparaiso, IN
October 28, 2008

Got Web Host, in its never ending quest to provide SEO web hosting for any economy or budget, is happy to announce a new array of SEO shared IP hosting plans.

These new plans come with the option of getting 5, 10, 15, 20, 25 or 30 Class C IP ranges, and provide two IP's per Class C. These plans are set up as a reseller account, which means you can control all of your domains and IP's from one control panel, with one login for ultimate convenience.

Director of Internet Marketing, Tanya Martin, said of the addition, "While we feel dedicated IP's are the best as far as SEO is concerned, we understand that not everyone feels the same way, and shared IP's are significantly cheaper. In today's economy we felt the time was right to introduce more affordable SEO hosting plans to appease those that are feeling the crunch of the current recession."

Lloyd Brown, Director of Sales & Business Development, added, "We feel our pricing easily competes with the new discount SEO web hosting companies out there. We will not oversell or offer you a designated amount of storage/bandwidth then suspend your account for actually using it. I can assure you our support easily surpasses that offered by the "competition"."

As an additional incentive, Got Web Host will provide a free, one hour SEO consultation, which is a $500 value. Topics covered include discussing SEO problems you need solutions for, such as link building strategies, content optimization and site structure recommendations. This does not include doing the link building or content optimization. We will suggest and recommend what you can do to improve your

search engine optimization, or help you overcome a problem you have or may not know you have.

Got Web Host would also like to remind everyone of their knowledgebase which is available at no charge to everyone. This vast resource is updated daily, with articles and Flash based tutorials (most with voice). The tutorials cover subjects such as DirectAdmin, WordPress, phpMyAdmin, and most popular FTP and email programs. There are also tutorials to assist with managing your accounts with the most popular registrars, such as GoDaddy, NameCheap, Network Solutions and many more.

SEO articles range from optimizing your website for image search and the duplicate content penalty to SEO for press releases and much more. Please visit our SEO and web hosting knowledge base for related articles and tutorials on these topics.

About Got Web Host:

Got Web Host has been hosting websites since 2002. As times change, hosting needs change as well, to which we strive to bring the best hosting solutions to meet these changes. Multiple Class C IP's are difficult, if not impossible to find with most hosting companies. Many simply cannot provide multiple dedicated IP's. Got Web Host offers Multiple Class C IP's to their users in a wide variety of options. While several hosting companies are now attempting to break into this market, Got Web Host not only offers the service, but also understands why you need it and we bring it to you with many different packages.
