

Everyone with cancer should be able to look forward to something special. *Life.*

*November is Cancer Awareness Month*

Advances in medicine, therapies, education and lifestyle have helped millions of people become cancer survivors. But even with all this progress, cancer still takes away the lives of 1,500 men, women and children every day in the U.S. So during Cancer Awareness Month in November, let's continue to promote awareness of prevention, early detection and treatment. And let's also get the word out that we will not stop this nationwide effort until everyone who gets cancer can look forward to a second chance at life.
