

ParetoLogic Anti-Virus PLUS

Complete protection from viruses, spyware,
and other malicious code!

ParetoLogic Anti-Virus Plus acts as a "Great Wall" of protection

Key Product Features:

- Detection and complete removal of viruses, spyware and malware
- In-depth scanning and cleaning process that finds and eliminates even the most sophisticated threats
- Blocks access to malware related URLs
- Customizable scanning
- Quick, easy-to-use
- Free database updates to keep you protected against the latest threats

Protects you from viruses, spyware, malware, spam and phishing attacks

Are you concerned viruses have your computer under siege?

Although computer viruses are not a new threat, they continue to wreak havoc. Viruses can damage your programs, delete files or even reformat your hard disk. Even seemingly benign viruses can affect your computer's performance by taking up memory, thus starving your legitimate programs. This can cause erratic performance, crashes and even data loss.

Are you worried about keeping your information safe?

As well as viruses, computers are also under attack from spyware and other dangerous malware. Spyware can install without your knowledge and be used to swipe your confidential information for credit card fraud and identity theft.

Protect your PC and yourself!

ParetoLogic Anti-Virus PLUS acts as a great wall — using a sophisticated scanning and cleaning engine, ParetoLogic Anti-Virus PLUS provides an integrated protection solution. It finds and removes viruses, spyware, malware and even rootkits, which try to cover the tracks of potentially damaging software.

ParetoLogic Anti-Virus PLUS offers comprehensive protection from many threats.

*"I was shocked at how many viruses and spyware it found.
Thank you for keeping my system safe."
Jim E., United States*
