# Perryman Software

# **Ps Report Scheduler**

# For Scheduling Reports & Executables

#### **Make Informed Decisions**

Automatically process and deliver information when you need it, ensuring key decision-makers have the information needed in today's competitive business environment.

### **Increase Operational Efficiency**

Schedule daily jobs and reports for automated delivery during non-peak hours, leaving peak hours to handle traffic required to do business.

## **Keep Critical Employees on Task**

Ps Reports Scheduler enables missioncritical employees focus their time where it is needed most by scheduling and automatically running repetitive tasks and applications.

#### **Deliver Confidence**

Keep your operation running 24/7 by using Ps Reports Scheduler to process scheduled jobs or run jobs on-demand, as needed.

#### **Integrates with Leading Tools**

Ps Reports Scheduler is compatible with MS Windows XP Professional and reads from any Crystal Reports© data source, as well as Sage Software and Microsoft, and Windows applications.

### **Export Formats**

Adobe Acrobat PDF
Microsoft Excel
Comma Separated Values
HTML 3.2 or 4.0
Microsoft Word
Rich Text
Tab Separated Text
Text Format
XML Format

At Perryman Software, we work to help people and businesses realize their full potential.

Your success in today's competitive business environment requires that you optimize your resources, have current, accurate information, and make timely, informed decisions. Ps Report Scheduler, a Perryman Software custom application, will increase your operational efficiency, process scheduled tasks and deliver mission-critical information when and where it is needed.

The Ps Report Scheduler allows you to define and schedule stored procedures and reports, executables, and batch process tasks to be run monthly, weekly, daily, or on-demand. One Crystal Report can be used multiple times with different parameters because unique, preset parameters can be passed for each instance of a scheduled report. Parameters are entered during scheduling, and SQL statements can be defined as needed. Once scheduled, the item automatically runs at the designated time and can be output to an electronic file, printer, or automatically emailed to multiple addresses simultaneously. You only need one version of the report regardless of the output variations required, allowing you to build a comprehensive Crystal Reports library in a single location and edit one, not multiple, versions.

Included with the Ps Report Scheduler is the Ps Library, which controls user access and network connections based on group and individual privileges. Authorized users can define and schedule reports and executables or run them on demand without a local copy of the application or Crystal Reports on their client system.

From developing innovative solutions to providing award-winning customer support, Perryman Software is dedicated to surpassing your expectations in all aspects of our business.
