

## Get Answers the EASY way!

with the industry's only **Managed Service**  
for **Monitoring & Reporting**  
of **Identity & Access**  
information on core network  
**Directories and File Systems**

Introducing  
**SIMON**

NetVision has spent more than a decade building expertise. Now, we've perfected the delivery of that expertise.

We want you to squeeze every bit of value from our solution. And you don't want to deal with the hassles of hardware acquisition, software configuration, and policy management. So, NetVision has bundled its expertise into an easy-to-consume package giving you *maximum value* with *minimal effort* required. Here's what you get:

	<b>SIMON</b> (Managed Service)	<b>Competition</b> (Non-Managed)
Application Software	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Required Hardware	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Hardware Maintenance	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Operating System License, Configuration, and Security Hardening	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Supporting Software Licenses and Configuration (Database, Web Server, etc.)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Setup and Configuration of Best-Practice Policies, Filters, and Reports	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Immediate and Frequent Updates to Reports, Templates, Filters, and other Features	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Touch-Free Updates to Software Functionality	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Capacity Planning, Monitoring, and On-Going Optimization and Upgrades	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Support for Diagnosis and Repair of Software Technical Issues	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Support for Diagnosis and Repair of Hardware Technical Issues	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Independent 3 <sup>rd</sup> Party Monitoring	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Guaranteed Availability of Trained Staff	<input checked="" type="checkbox"/>	<input type="checkbox"/>

And because SIMON is delivered via an appliance in your environment, your sensitive security information remains within your own network.

## Managed Service

- Virtually Touchless Deployment
- Lower Cost vs. Traditional Software
- Zero Configuration & System Administration
- No Pre-Requisite Knowledge, Expertise, or Training Required
- Data Stays Securely On-Site
- No Hardware Requirement
- Unaffected by Staff Changes

## Built-In Expertise

- Focused on Critical Identity & Access Information
- Best-Practice Policies and Reports are Pre-Configured
- System Watches Critical Events and Knows When to Alert
- Real-Time Policy Validation and Remediation Tasks
- Eliminates Manual Log Analysis
- Immediate ROI

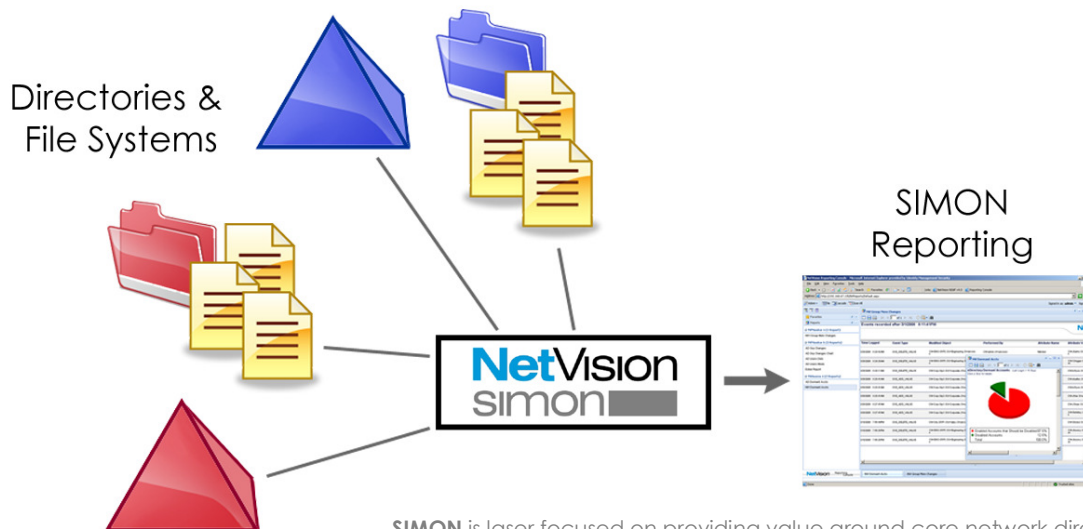

## Superior Technology

- Advanced Event Filtering Ensures Relevant Results
- From-The-Source Data Collection Generates Irrefutable Evidence
- Independent of System Logs and Vendors for True Third-Party Audit
- Easy-to-Use Reporting Interface Provides Immediate Results
- Captures Information That Is Otherwise Unavailable

**SIMON** enables you to:

- **Prove the Effectiveness** of Security Controls and Account Management Processes
- Detect **Inappropriate Changes** to Accounts or Access Rights
- Detect **Inappropriate Use** of Permissions or Other Policy Breaches
- **Identify Risk** based on Account Profiles and Access Rights
- Detect Administrative Mistakes and **Human Error**
- Easily Meet or **Exceed Audit Requirements**
- **Remediate Errors** or Policy Breaches in Real-Time
- **Provide Oversight** on Use of Delegated Administration Rights
- **Enable Help Desk** with Actionable Pro-Active Information

**SIMON** provides **RELEVANT ANSWERS** to **IDENTITY & ACCESS** questions on **CORE NETWORK** platforms

Contact us for more information or a **FREE demonstration of SIMON!**

**SIMON** is laser focused on providing value around core network directories and file systems from **Microsoft™** and **Novell™**. These platforms are the **launch pad into the network** providing initial authentication as well as basic file and print services.

**Founded in 1995**, NetVision is a pioneer in identity & access monitoring and reporting. NetVision provides periodic assessment and real-time monitoring capabilities with superior event filtering and from-the-source data collection. NetVision is focused on providing relevant answers to critical identity & access questions across platforms on core network directories and file systems.
