

CaseComplete® 2009

Use Cases and Requirements Made Easy

Want to be productive today?

Serlio Software Development Corporation is pleased to announce CaseComplete® 2009. It just might be the first requirements tool you actually enjoy using.

CaseComplete 2009 is fast, flexible and easy to use. You can quickly identify use cases, actors and requirements, create diagrams and wireframes, and create professional-looking documents and reports—in just minutes—whether you work in a team of one, twenty, or more.

Project: P1816
Report Date: Nov-2-09 2:47:39 PM

Project: Customer Profiler

Overview		Number	
Actors	14	14	
Use Cases	57		
Requirements	0		
Diagrams	0		
Discusory Terms	0		
Package	14		

Number of elements that were added or modified within the last number of days:

Number of days	Since date	Actors		Use Cases		Requirements	
		Added	Modified	Added	Modified	Added	Modified
1	11/01/09	0	0	0	0	0	0
7	10/23/09	0	0	0	0	0	0
30	10/04/09	0	0	0	0	0	0
60	09/05/09	0	0	0	0	0	0

Use Cases: Number: Percent of total: 100%

Status: Pie chart showing distribution of use case statuses: Not Set, Home Only, Initial, Base, Complete, Deferred.

CaseComplete 2009 makes use case and requirements discovery, elaboration and reporting easier than ever.

New in CaseComplete 2009

- Generate a dashboard report and stay on top of your progress
- Cross reference use cases and requirements to determine impact analysis of changes *before* making costly errors
- Forecast project resource requirements using “what-if” scenarios with the CaseComplete Estimator
- Add requirements as diagram elements
- Import and Export requirements from and to Microsoft Excel spreadsheets
- More pre-built reports
- More custom reporting options

Forget about spending valuable time away from the office in training—Most CaseComplete users are productive the very first day.

Today you have to accomplish more with less. Tight budgets, schedules and staff means that there’s little margin for error. CaseComplete 2009 means more time spent delivering great software and less time spent reworking mistakes.

Hundreds of companies worldwide have discovered CaseComplete. Now it’s your turn—go to www.casecomplete.com and be productive today.

Try CaseComplete 2009 risk-free with a no-cost, no-obligation thirty day trial. Download it today at www.casecomplete.com

CaseComplete[®] 2009

Use Cases and Requirements Made Easy

DATA SHEET

FEATURES AND BENEFITS

CaseComplete 2009 is designed to help business analysts and business stakeholders discover, refine, verify and communicate system requirements. Goal-driven approaches iterate through discovery and refinement of actors, use cases and requirements. Advanced diagramming, reporting and document creation ensure consistent understanding and execution of system requirements.

CaseComplete 2009 is easy and intuitive with no extensive training required. CaseComplete 2009 can be used effectively by analysts, developers, test teams and business stakeholders.

CaseComplete 2009 is flexible and customizable for your particular needs, and integrates with the software tools you use today.

A complete evaluation guide is available at <http://www.casecomplete.com/EvaluationGuide.aspx>

SYSTEM REQUIREMENTS

- Microsoft Windows XP or later
- 512M system memory
- Microsoft .Net Framework 2.0 or 3.x
- Microsoft Office 2002 or later (required for generating Word documents)

KEY FEATURES

Requirements Discovery

- Capture Actors, actor goals
- Automatic use case generation from goals
- Capture, refine use cases
- Extension points
- Use Case Pre-conditions, Post-conditions
- Non-behavioral requirements capture
- Issue tracking and Reporting
- Glossary
- Custom data fields

Diagrams and Prototypes

- Use Case, activity diagrams
- Auto-generate activity diagrams
- Flowcharting
- Wireframe prototyping
- Freeform diagrams

Reports and Documents

- Use Case, Requirements specifications
- Use Case / Requirements cross reference
- Use Case traceability
- Customizable reports

Project Planning

- Project dashboard reporting
- Use Case Point project effort estimation
- Use Case complexity estimation
- Model export to Microsoft Project

Test Planning & Execution

- Test procedure, expected result capture
- Automatic association of use cases, test cases
- Generate test procedure
- Generate test checklist
- Generate forms for recording test results

Team Capabilities

- Supports multiple user access
- Supports source controlled models
- Generate HTML documents, reports for web publishing

Tool support

- Microsoft Word, Microsoft Excel, Microsoft Project
- XML, XMI (UML) export
- Flat file export
