## Next Generation GPS/LBS Technology Acquisition Opportunity

**Portland, Oregon (December 9, 2008)** - Global Technology Transfer Group, Inc. (GTT) is pleased to announce an acquisition opportunity in the "Location Aware" Networking space.

This opportunity represents an essential patent portfolio, technology, and human capital acquisition. In development for over four years, the technology constitutes a quantum leap forward in Location Aware Systems, displacing global positioning and ancillary systems. The technology directly applies to all terrestrial and airborne wireless devices, allowing all such devices to simply know where they are through normal communications alone.

"We are very excited to be exclusively representing this opportunity," remarked GTT's CEO Michael Lubitz. "The Client has repeatedly developed break-through technology and related patent portfolios. The significance of the innovation and the history of the founders makes this a rare opportunity for the select acquirer."

### **About Global Technology Transfer Group, Inc.**
