

# VENCORE

Powered by **CaseRev**

## Executive Summary

**CaseRev's VenCore™ Platform helps organizations to improve how they manage and control service assignments and service partners.**

VenCore™ is designed for organizations that manage service provider networks for hiring by clients, those that maintain panels of “approved” providers for hiring by staff, or companies that simply desire access to the industry’s best providers. Provided in a configurable Software-as-a-Service (SaaS) environment, VenCore™ requires no purchase of hardware or software.

VenCore™ customers enjoy more streamlined assignments, immediate access to assignment status, and more efficient distribution of information. Powerful reports provide the information necessary to manage better. VenCore™ improves governance, enforces service standards, and captures service partner performance and quality information.

## Features

VenCore™ customers benefit from an array of features that strengthen how service assignments and partners are managed and controlled:

- 24/7 Access to assignment information
- Control in real-time which partners are “approved” to accept assignments
- Capture license, insurance, W9, and other compliance documents from each service provider
- Document and manage negotiated pricing agreements for each service partner
- Document user ratings for providers’ work
- Review partner invoices submitted as part of the assignment process
- Powerful management reports – compare quality, performance and cost across service partners
- Make assignments more quickly and efficiently
- Search for the right partner for each assignment
- System-generated alerts to keep partners on track with deadlines
- Messaging and notes in a collaborative environment

## Benefits

VenCore™ delivers the efficiency needed to drive down operating costs, while delivering the metrics and information necessary to structure better deals with preferred partners. Improved customer service, greater accuracy and reduced compliance risks are additional benefits.
