Lavasoft Anti-Virus Helix Key Features

- Advanced protection against malicious threats – viruses, worms, Trojans, bots, and more – with detection, quarantine management, and threat removal.
- Relieve the burden of constant cyber attacks with real-time protection, keeping you safe from sneaky assault tactics like drive-by downloads.
- AHeAD technology (Advanced Heuristics Analysis and Detection) detects and wards off unknown or rapidly changing virus attacks.
- Shield phishing attempts so your private and personal information stay secure.
- Guard against hidden threats attempting to access your system with advanced rootkit removal technology.
- Prevent e-mail virus attacks – one of the most common methods of infection – with an integrated POP3 and SMTP e-mail scanner.
- WebGuard examines Internet traffic and alerts you to malicious files and installations so you can download and surf safely.
- Fast, efficient, and resource saving scanning technology means your PC is efficiently kept safe and secure.
- Stay protected from the latest threats with frequent, automatic threat updates.
- Maximize your security with ease by benefitting from both scheduled scans and on-demand scanning.
- Minimize downtime if your system is damaged by an attack with a reliable Rescue System.
- Effortlessly stay in control of your PC with a user-friendly anti-virus program that is easy to download, install, and use.

About Lavasoft AB

- Established in 1999
- Private company
- Headquarters in Gothenburg, Sweden
- 4,000 partners in over 120 countries
- Over 300 million Ad-Aware downloads worldwide

The Lavasoft Mission

The Lavasoft mission is to deliver high quality security software solutions that protect individual computer users and business networks worldwide from compromising and intrusive privacy threats.

The Lavasoft Vision

Our vision is that every computer user, regardless of economic status or geographic location, has the power to control their individual privacy and security. We strive to promote an environment of ethical change in the spyware industry to uphold our ideals of social and corporate consciousness.

Thirty-eight percent of survey respondents reported a computer virus infection in the past two years; survey projections showed that virus infections prompted 1.8 million households to replace their PCs in the same time period.
