CodePartners Announces Year End Growth Results

Increased revenue, staff, and office space result in growth for CodePartners

Dallas, TX – December 19, 2008 – CodePartners, a software development firm, is pleased to report growth results for 2008. Revenues are projected to be up 150% from 2007, staff has more than doubled in the same period, and office locations have been expanded to accommodate growth.

Companies are exploring ways to be more productive and innovative with their current resources; CodePartners is able to deliver those methods through automation. "We attribute our success to the talented people we have on our team," said Brian Terrell, CPA and founder of CodePartners. "They are dedicated to helping our clients be successful and achieve productivity objectives. When we work with clients and review their business processes we are able to help identify areas that can be automated or streamlined with the use of technology."

CodePartners also has moved their Beijing, China location, led by Gary Feng, to a larger office to accommodate their growth. Additionally, an office in Yinchuan, China was opened and is under the direction of Yali Zhang. "We work with local universities to find talented students to bring them in to our intern program," said Brian. "From there, many of the interns choose to stay on after graduation with a full-time position." Yinchuan is home to Ning Xia University, and recruiting efforts have already begun there.

In the U.S., CodePartners works closely with The University of Texas at Dallas (UTD) by attending career fairs in search of interns and full-time employees. "Our relationship with UTD has been a long and successful one," said Brian. "Over the years we have found numerous talented employees from UTD; we have truly benefitted from that relationship."

CodePartners' headquarters, located in Dallas, Texas, is also in the process of adding more space to its office to accommodate growth.
