Re: Polygraph Examination

Attention: Mr. Greene

On December 2, 2008 a specific polygraph examination was conducted on Anand Jon Alexander. The reason for this examination was to determine if he was telling the truth when he said he did not rape Jessie B [REDACTED].

Prior to the polygraph examination, Mr. Alexander was asked to sign a polygraph release/consent form, which he did willingly. He was then given a control test to determine if he could and would respond to test questions.

The following relevant questions were asked:

- 5. Did [REDACTED] [REDACTED]? ANS. NO
- 7. Did [REDACTED] [REDACTED]? ANS. NO
- 10. Did [REDACTED] [REDACTED]? ANS. YES

After a careful evaluation of all physiological changes and a numerical analysis of all test results, it is the opinion of the examiner, John R. McGavock, that Mr. Alexander did not show criteria that is indicative of deception on any of the relevant questions and passed the test.

The type of instrument used in this examination was a Lafayette Diplomat I model 761-91G, which is a four (4) pin instrument that records, simultaneously on chart paper, breathing and respiration, galvanic skin response and blood pressure and pulse rate.

The type of test that was used in this examination was a Utah Zone Test, which uses the control question concept.

Sincerely,

John R. McGavock
Certified Polygrapher
