

Welcome

Central Gas Systems provide metered gas service to entire communities located beyond the natural gas grid. HBH Gas Systems coordinates all details to provide your development with a fully engineered, turn key gas system. With absolutely no liability to the builder or the developer, HBH Gas Systems enables you to steer your community away from the inefficient electric grid toward more sustainable development fueled by gas.

Central Gas Systems

- Fuel entire communities of any size from centralized propane tanks
- Provide turn-key gas for developments where natural gas isn't available

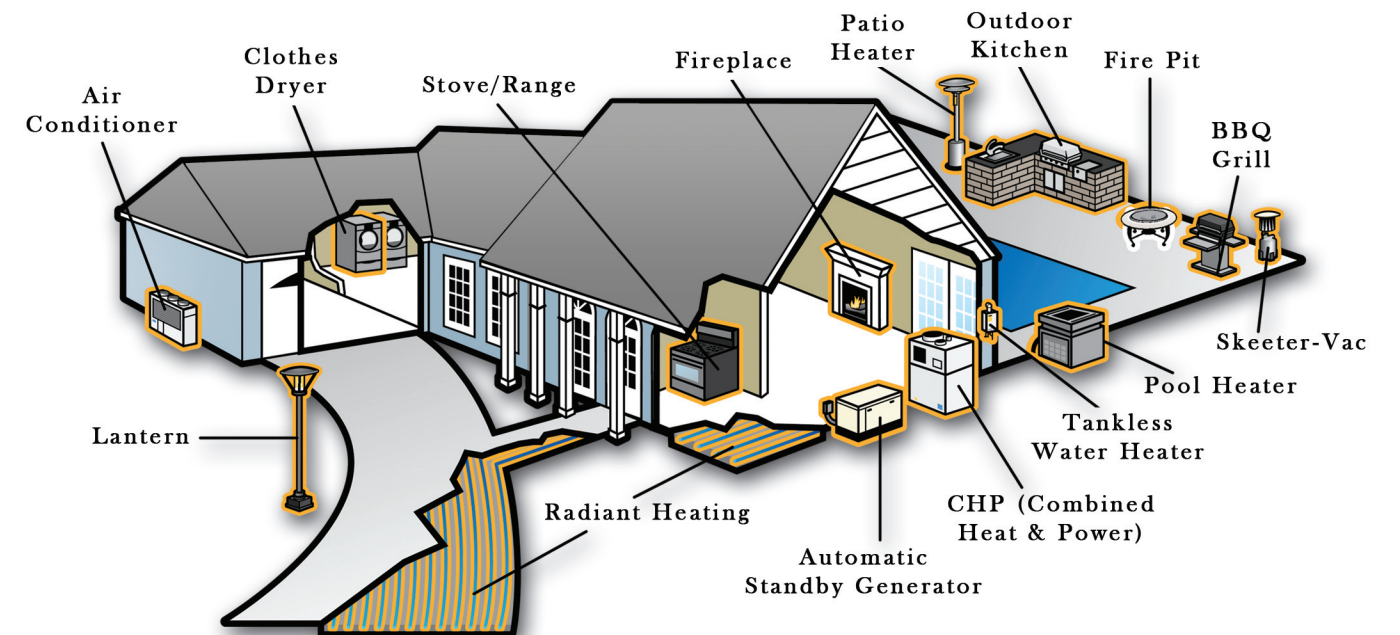

Why Use Propane?

- Increased Marketability
 - Majority of homeowners prefer dual-fuel homes
 - Lower utility bills, increased comfort & convenience
- Environmentally Friendly
 - Clean-burning & non-toxic to water
 - EPA-approved Alternative Green Energy
 - Increased Marketability
- Economical
 - Reduces reliance on the electric grid
 - Homeowners spend about half as much heating with propane instead of electricity
- Dependable
 - Easily transported
 - Domestically produced
 - Always Available

Conventional Applications

For Developments of Any Size, Anywhere

Alternative Applications

For Entire Residential & Resort Developments

- Community Centers -- Grills, Pool Heaters, Space Heating
- Fleet Vehicles -- Municipal, Police, Taxi, & School Bus Fleets
- Commercial & Retail Centers -- Restaurants, Banks & Stores
- Critical Backup Power -- Lift Stations, Hospitals & Schools
- Propane-Powered Lawn Care Equipment & Golf Carts
- Alternative Energies -- Backup for Wind & Solar Generation
- Surveillance -- Silent Power Systems for Remote Surveillance
- Combined Heat & Power (CHP) -- Residential & Commercial
- Agriculture -- Tractors & Vehicles, Crop & Food Conditioning
