# Windows Mobile Tracking Bundle £49!

The **KoolTrax software bundle** enables you to use your PDA as a tracking device as well as a search device. The bundle gives you PC software to administer and see 2 phones on a map.

One of the phones can have the **KoolTrax Handset** software, which shows a map on the phone, its own position, and the position of another phone.

One of the phones will have **KoolTrax Mobile** which reports its own position both to the Handset and to the PC.
