PHARMACEUTICAL project management

PHARMACEUTICAL INDUSTRY FOCUS

better understanding of what the industry does, which contributes to a more focused and meaningful approach on how to strengthen efforts, activities and actions that support the development and marketing of medicines.

CUSTOMER-SPECIFIC SOLUTIONS

superior industry-leading, life sciences-specific project management options that are designed to maximize return on investment by enabling clients to manage multifaceted research & development efforts, improve the impact of sales & marketing, and reduce the time, effort and cost associated with building and maintaining complex technical infrastructures.

EXPERIENCE

successful in the understanding of technology operations and the establishment and management of value-added enterprise Project and Program Management Offices (PMOs) across diverse functions. Experienced managing information system implementations and using enterprise project management tools. Flexible and pragmatic approach to problem solving, and an outstanding record of achievement in implementing new concepts, delivering innovative business solutions, and facilitating transition of operations with a high level of ethics and risk management alternatives.

- CRO vendor selection
- ICH Good Clinical Practices
- Phase IIIb and IV clinical studies
- pharmacoeconomic studies
- cGMP guidelines
