## Bluetooth® Wireless Transmitter/Receiver for Home Stereo

TM-01

## Unleash Your Music.

- + Transmit and receives high quality audio wirelessly using *Bluetooth* wireless technology to and from your home stereo entertainment system.
- + Connect with other devices connected to Tenqa TM models of *Bluetooth* Wireless Transmitters or mobile phones with *Bluetooth* A2DP wireless technology to receive high quality audio for playback over your home entertainment system for a full stereo sound experience.
- + Compact, streamlined design allows for easy placement while effortlessly blending in with the surroundings.
- + Receive audio from multiple sources including an iPod equipped with a Tenqa TM-03 *Bluetooth*® Wireless Transmitter for iPod®, mp3 players, portable gaming devices, or home computers equipped with a Tenqa TM-02 *Bluetooth*® Wireless Transmitter or stream music from *Bluetooth* enabled mobile phones featuring A2DP stereo sound technology.
- + Great for streaming audio from any device with a conventional 3.5mm headphone jack wirelessly to your home stereo for personal enjoyment or during parties.

## Bluetooth® Wireless Transmitter/Receiver for Home Stereo

TM-01

## Possible combinations

### In Transmitting Mode:

#### TM-01 paired with Tenqa TM-03 *Bluetooth* Wireless Transmitter for iPod

The TM-03 effortlessly turns your iPod into a "remote control" allowing audio to be transmitted wirelessly from your iPod to your TM-01 *Bluetooth* Wireless Transmitter/Receiver equipped home stereo, all from the comfort of your couch.

#### TM-01 paired with Tenqa TM-02 *Bluetooth* Wireless Transmitter

Easily turn any mp3 player, computer, or any audio device with a standard 3.5mm headphone jack into a wireless audio transmitter that connects with the home stereo. Music can be streamed from an mp3 player, your computer's audio player, or internet radio to your home stereo for unmatched better sound quality.

#### TM-01 paired with *Bluetooth* enabled Mobile Phone equipped with Music Player and *Bluetooth* A2DP technology

By 2011, it is estimated that more than 50% of mobile phones shipped will include music players and ultimately replace the standard mp3 player. In 2007 alone, more than 500 million mobile phones equipped with music players were shipped worldwide. Pairing a Tenqa TM-01 *Bluetooth* Wireless Transmitter/Receiver for Home Stereo with a mobile phone equipped with *Bluetooth* A2DP stereo sound technology is a simple way to transmit the music stored on a mobile phone to your home stereo for enhanced sound.

### In Receiver Mode:

#### TM-01 paired with Tenqa's HP series of *Bluetooth* Wireless Headphones

Transmit audio or music from your home stereo system or television to Tenqa HP series of *Bluetooth* Wireless Headphones for a wireless sound experience.

### Compliance

*Bluetooth* V1.2, Class 2 device

### Range

Up to 10 meters (33 feet) when connected to a Class 1 *Bluetooth* device

### Status indicators

Green power status LED and blue *Bluetooth* wireless connection status LED

### Power

USB to AC power cable included, internal rechargeable lithium ion battery

### Certifications

FCC Part 15B and 15C

### Dimensions

2.1 X 2.1 X 1.9 inches (5.3 X 5.3 X 4.8 cm)

### Package contents

- + Tenqa TM-01 *Bluetooth* Wireless Transmitter/Receiver for Home Stereo
- + USB to AC power cable
- + 3.5mm to dual RCA plugs for easy connection to home stereo system
- + Instruction manual in English

### Profiles supported

## Bluetooth® Wireless Transmitter

TM-02

## Unleash your Music.

- + Transmit high quality audio wirelessly from an mp3 player, computer, portable gaming device, or other devices with a standard 3.5 mm headphone jack using *Bluetooth* wireless technology to any of Tenqa's *Bluetooth* Wireless Speakers, *Bluetooth* Wireless Headphones, and the Tenqa TM-01 Wireless Transmitter/Receiver for Home Stereo.
- + Turn your mp3 player into a "remote control" that can be used across the room from the comfort of your couch, desk, bed or wherever when connecting to another Tenqa *Bluetooth* Wireless Speaker, *Bluetooth* Wireless Headphone, or *Bluetooth* Wireless Transmitter/Receiver for Home Stereo—without wires.
- + Adapts effortlessly with car stereos featuring *Bluetooth* wireless technology to stream audio from your mp3 player, computer, portable gaming device or other devices with a standard headphone jack connected to a Tenqa *Bluetooth* Wireless Transmitter without unsightly cables, inferior sound, or frequency interference often found in FM transmitters. Simply enter your car and enjoy wireless connectivity to your stereo system.
- + Store your mp3 player in a more convenient location when working out, jogging, riding your bike, or commuting to keep pesky, tangled wires out of sight.
- + Transmit audio from your home computer to Tenqa *Bluetooth* Wireless Headphones, Tenqa *Bluetooth* Wireless Speakers or even to your home audio system with a Tenqa *Bluetooth* Wireless Transmitter/Receiver for Home Stereo.
