## Bluetooth® Wireless Car Speakerphone

SPK-01

## Handsfree in Your Car.

- + Several states are now passing laws restricting the use of mobile phones while driving. Tenqa's SPK-01 Bluetooth Wireless Car Speakerphone bypasses these laws and equips your car with an easy to use handsfree system.
- + Pairing with a Bluetooth wireless enabled phone is simple. Simply tap the power button on the device and it automatically connects to your mobile phone.
- + Caller ID function displays incoming and outgoing callers so there is no need to remove your mobile from your pocket or bag.
- + Efficient battery extends the battery life for several weeks in standby mode without charging.
- + Enhanced echo and noise reduction technology.
- + Functions as a portable speaker for pairing with mp3 players or broadcasting music from your mobile.
