

MAGIX Movie Edit Pro 15

Your recordings deserve the best!

With its MAGIX Movie Edit Pro 15 and MAGIX Movie Edit Pro 15 Plus, MAGIX presents the next generation of video editing for beginners as well as advanced users.

Countless automations, innovative functions and highly developed video and audio technologies make editing and dubbing of video recordings pure joy and guarantee quick, professional results.

** 65 awards refers to the following versions of MAGIX Movie Edit Pro (Classic & PLUS versions): 6, 7, 8, 9, 10, 11, 12. Award wins from other countries refer to the country-specific version. More information at www.magix.com.

New functions in Movie Edit Pro 15:

NEW! Blu-ray Discs™ with animated menus

Burn your movies with professionally animated menus to Blu-ray disc™. A large selection of high-quality menu templates for any occasion is available to you for use in your projects.

NEW! Completely new, re-designed interface

The new interface makes editing your movies even more fun than before. All important functions are in plain view and can be reached directly via the interface. In addition, all elements of the user interface can be freely arranged and moved – just how you want them.

NEW! Includes travel route animation

Ideal for visualizing your travel itineraries in your vacation videos – in full HD quality. Show your family and friends the route that you have driven, flew or sailed.

Additional new functions of the Plus version:

NEW! MultiCam editing (with 2 cameras)

Edit videos like a pro: You can now perfectly synchronize recordings from 2 different video cameras, which film the same event (e.g. concert, wedding, etc.). Simply import both recordings synchronize using parallel image or sound sequences and then select the best scenes into the video window simply using a mouse click. Movie Edit Pro 15 Plus then automatically creates a new video track, where various camera changes are integrated.

NEW! Native AVCHD editing

Do you have an AVCHD camera and would like to import and edit your recordings directly without cumbersome recalculation? Then, Movie Edit Pro 15 Plus is the optimal solution: import AVCHD material with one click, optimize and dub perfectly, burn to Blu-ray Disc™ with an animated menu and present on TV! Brilliantly sharp, professional results guaranteed!

NEW! New, professional editing functions

MAGIX Movie Edit Pro offers even more professional editing functions to users with high demands: from easy color correction to an improved keyframe control, re-worked effect control and much more. In addition, the Plus version offers countless high-quality templates for breathtaking 3D title effects.

With MAGIX Movie Edit Pro 15 your most beautiful video moments will be transformed into exciting movies in a flash: with fitting background music, animated fades, text and professional special effects! Simply import your video material from any source, splice and edit as you wish and burn directly to disc – including professionally animated menus.

Additional advantages of Movie Edit Pro 15

Reads videos from any source:

In addition to HDV support, Movie Edit Pro 15 also reads recordings from every other video source: digital & analog camcorders, TV cards (DVB T/S and analog), webcams, digital cameras, etc.

32 tracks for arranging

Would you rather design your recordings yourself? A total of 32 tracks, open to arranging offer enough space easily optimize your project – quick and smooth! With just a few clicks you can add fades, effects, titles and your favorite music. Done!

Video editing assistant

With the integrated video editing assistant you can create fantastic movies completely automatically – even without previous video editing experience! Choose from various themes (for example, winter/beach vacation, party, Christmas). The integrated edit automation transforms your recordings completely automatically into a professional video including titles, transitions, effects and music. The quickest way to unforgettable movies!

MAGIX Soundtrack Maker

MAGIX Soundtrack Maker creates musical tracks that are precise to the second, exactly how you want them. You decide the mood of each scene or the emotion that you want to impart (action, suspense, happiness...), and the program automatically creates an individual soundtrack using a large sound archive. The result will convince you!

Animated DVD menu templates

Unique and only with MAGIX: In just a few minutes you can create animated DVD menus just like those found on store-bought DVDs using motifs from your own video projects. A selection of high-quality animation effects creates lively menu compositions. Bring joy to your family, friends and neighbors with your creative projects.

Export to mobile video players

Transfer your movies directly from MAGIX Movie Edit Pro 15 to your portable video players, mobile phones and other mobile devices. Using the helpful batch processing function, you can even convert the format of any number of videos at once and export them.

Upload movies to YouTube™

Share your most beautiful, funnies or most spectacular videos with the whole world. Via the "Online" menu you can directly upload your movies to the YouTube™ portal. This way, video enthusiasts from around the world can watch your recordings and even leave comments on them. Give it a try!

Additional advantages of the Plus version

- 99 tracks for video, audio, photo and text
- Fully HD work flow (import, edit, burn)
- Surround Sound creation (Dolby Digital 5.1 Creator)
- Screen capturing: record video direct from the screen
- Advanced DVD & Blu-ray menu design
- Audio Mastering Suite 2.0 for professional sound editing
- Batch conversion for entire folder
