

Customized Security.

Kwikset's SmartKey™ is a technological innovation that provides **superior security**. It also provides you the flexibility of re-keying your own locks, yourself, quickly & easily without removing them from your door.

SmartKey allows you to control who has access to your home. When it's necessary to loan out keys to **household help, contractors or neighbors** - you can re-key your lock to a spare set & change back to your personal set when you wish to disable the loaners. **Re-key any time**, as frequently as you wish, while maintaining a high level of security.

\*\*Lock Bumping - an attack technique using specially cut keys that can defeat conventional pin & tumbler locks.

\*980 Deadbolt

### **SUPERIOR SECURITY**

- ANSI Grade 1 Deadbolt\*
- Heavy Duty Commercial Security
- BumpGuard™ protects against lock bumping\*\*

## SmartKey

### NEW TECHNOLOGY

Locking bar, racks and pins are made out of stainless steel for increased strength and durability.

### BUMPGUARD™

Patented side locking bar technology replaces a traditional pin & tumbler design to protect against lock bumping.\*

### DRILL RESISTANCE

Cylinder uses two steel balls inserted into the front of the key face to resist attack from drilling.

### KEY IT YOURSELF

Lock is rekeyable by using the included learn tool in less than 30 seconds without removing the lock from the door.

\*Lock Bumping - an attack technique using specially cut keys that can defeat conventional pin & tumbler locks.

# HOW TO RE-KEY WITH SMARTKEY?

## BEFORE YOU START...

These steps show you how to re-key a lock to match a customer's current key, or that of another lock being purchased. For new purchases, the current key is the one that is supplied with the lockset.

These illustrations show a deadbolt for demonstration purposes, but these SmartKey rekeying instructions also apply to Kwikset keyed knobs, levers, and handlesets.

### DEFINITIONS

### STEP 1 TURN TO LEARN POSITION

**WHERE TO GET A LEARN TOOL**  
Carries in every Kwikset Signature Series® package.

\*For deadbolts, make sure you grasp the torque blade from behind to prevent the cylinder from spinning freely.

### STEP 2 INSERT AND REMOVE SMARTKEY TOOL

### STEP 3 LEARN NEW KEY

Kwikset  
**SMART KEY**

## FAQ's

### Is a Kwikset SmartKey lock more secure than a traditional pin and tumbler lock?

- SmartKey features BumpGuard™ - protects against lock bumping.\*
- SmartKey is pick resistant and passes the highest test standard against lock picking - UL 437.
- SmartKey provides the flexibility to frequently change your house keys.

### If SmartKey is so easy to re-key, what will prevent someone from being able to re-key my locks?

- SmartKey can only be re-keyed as long as you have the current operational key. If someone does not have the current operational key, then that person will not be able to re-key your locks.

### After I re-key a SmartKey lock, will I need to keep my old keys that don't work the lock anymore?

- No, by re-keying your lock your old key is now obsolete. The new key becomes the current operational key that can now re-key your lock in the future.

\*Lock Bumping - an attack technique using specially cut keys that can defeat conventional pin & tumbler locks.

### Am I limited to how many times a SmartKey lock can be re-keyed?

- No, you can re-key a SmartKey lock as often as you'd like to.

### What happens if I lose my current key?

- The lock must be removed from the door and then the cylinder removed. Then a SmartKey reset cradle would be used to put the cylinder into learn mode. Then, a valid Kwikset key can be inserted, rotated and then the cylinder will work with this key.
