## GEOGRAPHY

The Azores is an archipelago in the Atlantic Ocean between Europe and North America. It lies on the Lisbon parallel, on latitudes 39° 43' / 36° 55' N. The nine islands cover a total land surface of 2,333 km<sup>2</sup>, with an economic exclusion zone of 984,300 km<sup>2</sup>. The land areas of individual islands vary between 747km<sup>2</sup> (São Miguel) and 17kms (Corvo). The Pico volcanic cone is 2.351m high, the highest in the Azores and Portugal as a whole. The population of the Azores tops 240,000 inhabitants (2001 census).

## THE AZORES

The Azores are nine dramatic volcanic islands thrust from the sea thousands of years ago. They are a natural marvel, from the crater lakes and lagoons high in the mountains overlooking the ocean to the peaks of ancient volcanoes rising above the green landscape. Even more impressive is the Azorean dedication to keeping the islands naturally pristine. The European Union recognized the Azores Islands for their commitment to the environment, as evidenced in the numerous nature reserves and protected parks and forests. The National Geographic Center for Sustainable Destinations has named the Azores islands as the world's second most appealing islands destination in its fourth annual Destination Scorecard survey. The Azores received the title of "Authentic, unspoiled, and likely to remain so."

## HISTORY

The Portuguese first reached the Azores in 1427. Their caravels put in at the islands of Santa Maria and São Miguel, and from those beginnings, all nine islands were gradually settled. During the 16th and 17th centuries, the islands' geographical position was pivotal for Atlantic navigation between Europe, the Orient and the Americas. During that period, the sea around the Azores was the scene of important sea-battles, and pirates often attacked the islands themselves. Over the following centuries, the archipelago developed with the introduction of new crops, animal husbandry techniques and larger fisheries. The Azores has always been part of Portugal and today has Autonomous Region status with its own Assembly and Government.

# SÃO MIGUEL

São Miguel is considered the capital of the Azores and is the biggest, most diverse and most populated island among the nine. It's known for its volcano-created lakes, its sulfur springs spa, its historic towns and its beaches and mountains. It's also called the "Green Island" because of its interior, where good soil makes for productive agriculture. All the roads leading around the island of São Miguel provide views of the rolling hills, the ocean and the occasional cattle wandering on the road.

On the eastern side lies Lagoa do Fogo or "Lake of Fire," a deep caldeira with a lake at the bottom. Nearby are two tea plantations—the only tea plantations in Europe. Visitors can walk the fields, tour the tea factories and then have a cup in a stone-walled café.

Along the cobblestone street of the town of Furnas, some 23 types of mineral water flow and geysers bubble. Furnas is also famous for its natural spas, where for decades travelers have flocked from all over the world to soak away their cares.

Ponta Delgada is the largest city in São Miguel. The city offers plenty of places to dine. Prices are reasonable and the meals tend to be large, with generous portions of grass-fed beef and fresh ocean fish.

The city's numerous gardens burst with the diverse vegetation that blooms in the Azores' unique climate, making it a hot spot of interest for green thumbs.

West of Ponta Delgada is the Sete Cidades region, where a short hike can lead to views of crater lakes and lush hillsides that sweep down to the deep, blue-green waters.

## Top 3 Hikes in the Azores

**1. Povoação to Nordeste, São Miguel Island** – This eleven-mile hike passes through forests and small villages while providing views of flowered-covered hills and rare Portuguese bullfinch, the priolo.

**2. Pico Mountain, Pico Island** – Nearly a mile above the Atlantic Ocean, Pico Mountain showcases the rest of the islands of the Azores amid its backdrop of the volcano craters and flower-covered slopes. A strenuous but not technically difficult climb, the island does require you to bring a registered mountain guide.

**3. West Coast Walk, Flores Island** – This ten-mile coastline hike can be done in one day or spread out over two days. Steep ascents and descents take you from cobbled paths to grass to dirt pathways that cover the rolling coastline of Flores.

# TERCEIRA

Terceira, meaning "third" in Portuguese, is so named because it was the third island to be discovered, in 1427. It is the most developed of the five central islands – a result in part of the large American-run airbase that has been operating at Lajes since World War II. Terceira is famous for its unusual form of bull-running, known as the "tourada à corda" (bullfight with a rope), which takes place from Spring to Autumn. Angra do Heroismo was declared a UNESCO World Heritage site in 1983, in recognition of the strategic role the port has played in the Atlantic. For over three centuries the town was a stopover point on the routes between Europe, America and Africa.

# LISBON

Portugal's capital sits on the north bank of the Tagus estuary, 17 km (10 miles) from the Atlantic. The city has a population of about 700,000, but the conurbation of "Grande Lisboa", which has engulfed many surrounding villages, has over one million people. Razed to the ground by the earthquake of 1755, the city centre is essentially 18th century, with carefully planned elegant streets in the Baixa. On the hills on either side of the centre, the narrow streets of the Alfama and Bairro Alto make it a personal, approachable city. Since its days of glory during the Age of Discovery when the city was at the forefront of world trade, Lisbon has been an important port. Today the docks have moved; however, the great monuments in Belém still bear witness to the city's maritime past.
