

Prodiance At-a-Glance

Why Enterprise Spreadsheet Management?

With over 150 mission users worldwide, Microsoft excel is perhaps the most ubiquitous analysis and management reporting tool on the planet. Spreadsheets, Access databases and other end-user computing (EUC) applications are used every day in organizations across the globe to drive critical business decisions. Yet, with this power and ubiquity, organizations are exposed to unacceptable business risks when critical spreadsheets and EUCs are managed in uncontrolled and unmonitored environments. Spreadsheets and EUCs absent the proper IT controls can lead to significant errors, non-compliance with regulatory mandates, operational risk, and even fraud.

Due to heightened scrutiny by auditors, regulatory mandates such as SOX 404 and the NAIC Model Audit Rule, and numerous well documented spreadsheets impacting financial statements, organizations are taking action to help establish proper safeguards and controls over mission critical spreadsheets and EUCs. Prodiance delivers a comprehensive solution to help organizations achieve these goals by automating controls over mission critical spreadsheets and EUCs, while satisfying the latest guidance from leading audit firms.

Why Prodiance?

Prodiance was spun-off in mid-2005 from Scientific Software, inc. after 15 years of success in delivering GRC solutions to the top 10 leading pharmaceutical and biotech companies in the world. Helping organizations manage risk and improve compliance is in our DNA. Leveraging this expertise, Prodiance has quickly become a recognized market leader for Enterprise Spreadsheet Management software. We deliver a comprehensive solution that encompasses all phases of the Spreadsheet and EUC Lifecycle, from discovery, to inventory and risk assessment, management and control, to optimization, certification and reporting. Prodiance has gained the confidence and trust of the largest global organizations through more than 60 successful deployments. Our solution is award-winning and has gained recognition from industry experts and validation from leading analyst firms. With its web based architecture, it is non-invasive and intuitive for end users, and easy to deploy and maintain.

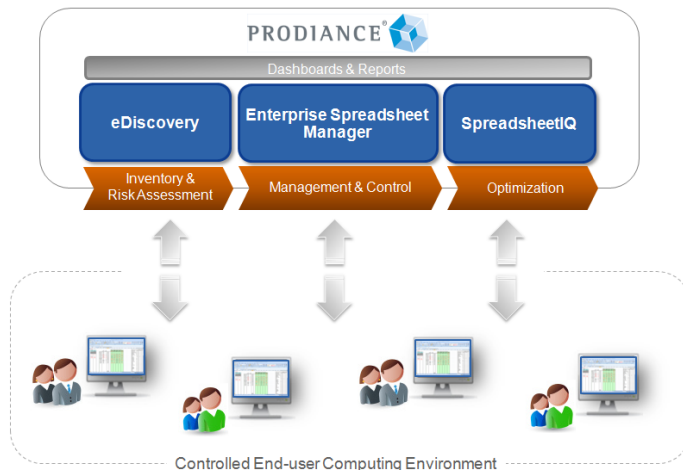

Microsoft
GOLD CERTIFIED
 Partner

Solution Overview

The Prodiance Enterprise Spreadsheet Manager system is a proven software solution to help organizations discover, inventory, assess risk, manage and control, optimize, certify and monitor mission critical spreadsheets, Access databases, and other EUCs.

The solution consists of an integrated suite of products, including:

- **Prodiance eDiscovery** –automates initial and ongoing discovery, inventory management and risk assessment for critical spreadsheets, Access databases and other EUCs.
- **Prodiance Enterprise Spreadsheet Manager (ESM)** – provides a controlled environment for critical spreadsheets, Access databases and EUCs through automated control including pervasive monitoring and

auditing of cell level changes, complete security and access control with cell level lock down, versioning, change control, segregation of duties, automated workflows and dashboards with drill down into detailed management reports.

- **Prodiance Spreadsheet IQ** – automates spreadsheet diagnostics, error checking and optimization.

Prodiance Delivers Proven ROI

As a result of deploying the Prodiance Enterprise Spreadsheet manager system, many organizations have realized a significant return on their investment by improving compliance, increasing audit efficiency (in many cases by 50-75%), driving process improvement through reducing cycle times by over 50% for spreadsheet review and approval, preventing fraud due to unauthorized changes, reducing operational risk and improving preparedness for litigation.

Recognized Market Leadership

Prodiance is a recognized leader in the GRC and Spreadsheet Management markets. We have won numerous industry awards from Windows in Financial Services and the San Francisco Business Times, and are well known within the IT industry analyst community with firms like Bloor Research UK, Ventana Research, Gartner and Forrester Research. These firms can speak to our strong vision and understanding of customer needs, and the strength of our technology.
