

## 2-4GB Flash / Embedded Fingerprint Sensor / AES 256 Encryption / FIPS 140-2 Cryptographic Module

Ceelox Vault is a biometrically enabled encryption and decryption application. Ceelox Vault allows users to quickly and easily encrypt and decrypt sensitive data with a simple drag and drop, along with security of a unique fingerprint as the key. When bound to a portable flash memory device or external hard drive, Ceelox Vault allows a user to feel comfortable when transporting sensitive files and folders.

When installed on a desktop or a laptop, Ceelox Vault perfectly complements full-disk encryption solutions that render removable storage devices "not portable." You get the best of all worlds: simple and easy to use data protection application, biometric authentication for data access and a truly portable encryption and decryption system for your sensitive data. Ceelox Vault offers a File Manager-like interface with shortcut links to My Documents and Desktop. It allows for the automated synchronization of files located on either the host computer or the portable device.

### Ceelox Vault Portable Edition Flash 2 or 4GB Capacity

Item Number:	CSFPF 2-4GB
Capacity:	2 or 4GB (High speed flash memory)
Interface:	Hi-Speed USB 2.0 (480Mbps) USB1.1 Compatible (12Mbps)
Fingerprint Sensor:	Built-in Fingerprint LTT S5500 Swipe Sensor with cover
Data Encryption:	AES 256, optional FIPS 140-2 Cryptographic Module
Installation & User Management:	Truly plug and play. Easy to use, drag and drop encryption on files and folders. Work with encrypted files within the Vault. Four authentication modes, including two-factor authentication.
System Requirements:	USB 2.0 Windows® XP/XP Pro Service Pack 2 and Vista Operating Systems Pentium® III 700 MHz/Intel processor or higher recommended 128MB of RAM or higher recommended
Power:	Power supplied by USB port (5v/500ma), no additional power needed
Comments:	FIPS Certified Encryption Module listed by NIST (Nation Institute of Standards and Technology) certificate #733. Fingerprint key for encryption and decryption. High quality durable injected molded plastic. Lightweight , easily carried in a shirt pocket or placed on desktop.
Box Content:	Ceelox Vault Portable Flash Drive; Hi-Speed USB 2.0 cable; CD with PDF User's Manual; Quick Start Guide.
Warranty:	Flash Drive Warranty (1 year replacement)
Dimensions:	3" x 3/4" x 1/4"
