CodePartners Develops International Business Opportunities

Dallas, TX – February 20, 2009 – CodePartners, a software development firm, recently met with several companies with operations in China to explore software development and industrial automation project opportunities. The meetings were part of a three-week long trip to China by U.S.-based Mr. Bin Feng, president of CodePartners, and Mr. Joshua Lei, CodePartners' project manager intern.

"There is a significant amount of opportunity for us in China," said Mr. Feng. "We work with our clients as partners to design and build custom solutions to enable their growth. We have found that businesses that take advantage of technology are rewarded with increased productivity and efficiency, and ultimately increased revenue."

CodePartners met with companies in the banking and precious metals industries. The project needs are varied according to Mr. Feng and include a complex customer relationship management (CRM) system, a distribution center management system, and a web portal. CodePartners is looking forward to the challenge of developing these systems and delivering the highest quality solutions backed with superior service and support.

While in China, Mr. Feng and Mr. Lei spent time in both CodePartners' Beijing and Yinchuan offices. "This was a great opportunity to work with our team in China to refine processes," said Mr. Feng. "We developed workflow to streamline the development, testing, and communication process throughout the project development life cycle. The end result is a higher quality product we can deliver to our clients."
