

Portland Wiz Kids

presents

Camp Wiz Kids

Having FUN with Technology

For Kids in Grades: K - 4

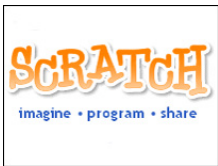

Location: Woodstock Community Center, 5905 SE 43rd Ave, Portland,

Dates: 3/23 - 3/27/09

This week-long camp, offered by Portland Wiz Kids, gives children a chance to be **inventive** with **technology** and introduce them to engineering, computer animation, stop motion animation, video production, and robotics to make science and technology **FUN**. Each program engages kids in the **creation** of **hands-on** science, engineering, or technology-based **projects**, rather than simply the consumption of technology products. Workshops available include:

Computer Animation with Scratch

Learn how to design and program your own animated clips or games by combining graphics, photos, music, and sound into interactive creations.

Stop Motion Animation

Kids will use still photos to create Stop-Motion Animation, a way to create animated films to share ideas and to communicate ideas.

LEGO Physics

Learn how to build your own movable Lego projects. In this class, you will discover how simple machines like levers, pulleys, and gears work.

LEGO Robotics

Learn about LEGO NXT Mindstorms as a system to build robots. After learning about the different components available, you will use program your robot to solve challenge missions.

Playful Inventor's Workshop

Using a mini programmable computer called a PicoCricket, mix technology and artistic creativity to create playful inventions such as a Playdoh Piano and Kinetic Sculptures.

Discover Engineering

Come learn about the excitement of engineering through hands-on projects. Every day, you will design and build an engineering project and will learn about what engineers do.
