The Business Central 200 is specifically designed for Small Business. It reduces complexity, increases productivity and enables customers to take control of the technology that drives their business.

The Sutus Business Central 200 is the perfect all-in-one solution for your small business.

The BC 200 offers an unparalleled combination of phone, networking and data applications that are fully integrated and designed for small businesses. You need more than just the right features, you need a solution that is comprehensive, affordable, reliable and one that just works, everyday.

Ease of Use

Industry experts and customers are unanimous in praising the Business Central 200's straight forward and easy to use web based interface. IIn fact, our management interface is so unique and easy to use, that it is protected by 3 different patents! Our configuration wizards, remote management and workspace tools allow it to be set-up by resellers or customers in significantly shorter time than the alternatives and at much less cost. While we recommend you have your reseller do the installation, this allows you to spend more of your budget on value add services and products instead of basic installation.

More Than Just a Phone System

Our patented Public and Private workspaces make it easy and efficient for business to manage their day to day operations. It comes with 2x250GB hard drives in a RAID configuration to protect your data - a feature some competitors charge more for - and all the software capabilities are enabled for a single licensing fee.

The Bottom Line

The Sutus Business Central Reduces Complexity, Eliminates Costs Associated with Implementation and Provides the Core Features your business needs.
