

RESCUE YOUR VIDEOTAPES!

Are your video tapes safe? Not really, there are lots of threats to your valuable memories: low life expectancy (even if stored in optimum conditions), magnetic fields, loss of quality due to abrasion, chewed-up tape and the end of production for VCRs could all mean it's the end of the line for your recordings!

But don't worry... You can back up your precious VHS cassette recordings and other tape formats using MAGIX Movies on DVD 7 and the practical USB video converter in just a few clicks to PC or DVD – including animated menus! Rescue your valuable memories by bringing them into the digital age!

Ideal for: VHS • Video 8 • S-VHS • Hi8 • Betamax • and all other tape formats

Additional advantages:

- Optimize and restore image and sound with just a click
- Create video discs with animated DVD menus
- Burn several movies or video clips onto 1 DVD
- Record TV programs

New! Burn video to Blu-ray™ discs
WebVideo recorders, new menu functions, and much more

Included!
USB video converter & SCART adapter
Directly connect video devices and your PC

Rescue your valuable memories!

With **MAGIX Movies on DVD 7** and the included USB video converter, you can comfortably secure all recordings from video cassettes on your PC or a DVD – with professional animated DVD menus.

From videocassette to DVD in just 3 steps:

Just connect the USB converter, start MAGIX movies on DVD 7, and import your valuable recordings in a flash. Next, you can edit your movies, optimize them, enrich them with effects, and even burn them to DVD with an animated menu. Enjoy them again and again on your PC or with any DVD player.

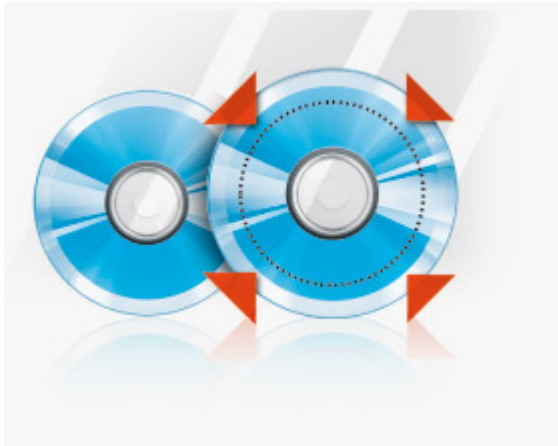

- 1. Import recordings 2. Adjust it individually 3. Experience it on TV!**

The clearly laid out user interface, the intuitive functionality, and the practical 1-click features make it easy for beginners and advanced users alike to produce impressive results.

Watching your movies will be as fun as making them!

The advantages of DVD:

- No sensitive, mechanical components
- Playable in any DVD player or PC
- Long lifespan, relatively robust
- Smaller size, convenient for archiving
- Offers the best digital image and sound quality
- More storage space, faster navigation

Easily optimize camcorder recordings

Import your homemade videos straight from your camcorder and enhance your work with precise cuts, transitions, background music, opening credits, and titles. With the integrated MAGIX MovieShow Maker you can automatically add your choice of ten different styles, like Christmas, winter holidays, parties, and more.

Watch & record TV programs

Transform your PC into a digital TV/VCR: Ideal for playback on PC monitors, projectors and TV devices. Includes DVB-T/S and analog TV, TV program guide with automatic timer, timeshift, removal of ad blocks and support for PC remote controls.

Backup copies of video CDs & DVDs

Save copy-protected video DVDs with your own DVD menus onto disc by analog transfer from your DVD player in just one step, or create digital backup copies of non-copy protected video CDs/DVDs and DVD videos with storage space compression to standard 4.7 GB blank DVDs ("9:5 shrinking").

Improve DVD recordings

Import video DVDs from your DVD recorder, remove disturbing advertising from the movies and TV series you recorded, or label your recordings in a flash with attractive DVD menus.

Compile & burn Internet videos

Burn your favorite web videos on cost-effective data CDs or with the right DVD menus for your DVD player.

This way you'll always have the best clips and videos handy, so you won't always need to search for them online. You can also enjoy all of your movies in fullscreen on your TV!

New! WebVideo recorder

Practical: Record all Internet videos using screen capturing directly from your PC screen and then burn them straight to a CD or DVD.

It doesn't matter what you watch – web TV, video portals, or movies: simply record and enjoy your media again and again regardless of formats and download methods!

New! Personalized DVD menus

Something to be seen: With plenty of high-quality templates for animated menu backgrounds, your own recordings will look like professional, store-bought DVDs. Fitting menu backgrounds are guaranteed to look great, and you can create them automatically from your own video material. It doesn't get any more personal!

New! Present it online as a web DVD

Present your movies online with their own DVD menus on your own free video website; It's perfect for separating longer sections of movies and making them more comfortably enjoyable. In mixed-mode albums you can present your videos and photos together – pure multimedia!

Your benefits at a glance!

Record & Import	
Digitize memories from VHS, Video8, etc.	Import analog recordings digitally via a dedicated video input to your PC
Record TV shows (analog TV & DVB-T/S)	VCR with timer, timeshift function and program guide (via DVB + Internet) for fully automatic recording
