# ScienceLogic Enhances Manageability of Dell Platforms and Services as Dell ISV Certified Partner

*EM7 Meta-Appliances integrate seamlessly with Dell™ OpenManage™*

**Reston, VA – March 25, 2009** – ScienceLogic, a leading IT Operations Management provider, announced today its status as a Dell ISV Basic Certified Partner. Dell has validated the seamless integration of EM7 Meta-Appliances with Dell OpenManage systems management functionality and certifies that the implementation performs to Dell standards.

Out of the box, EM7 Meta-Appliances perform an intelligent auto-discovery to identify networked devices, applications and services. Best-practices based monitoring policies called EM7 Dynamic Applications immediately provide the information system administrators need to maintain system health and business service levels. Automation and best practices are especially important at scale; EM7 is designed to provide a single pane of glass view of operations spanning hundreds to thousands of networked devices. For the integration with Dell OpenManage, this translates to a universal view of performance and availability across all Dell servers on a customer's network plus configuration and change information to complete the full picture – from information on associated switches, storage and power metrics to asset and warranty information that are all automatically saved in EM7 as asset records.

"We are pleased to join the select group of IT management software vendors that have passed the Dell certification for ISV Partner," said David Link, CEO of ScienceLogic. "We've spent years fine tuning the EM7 Dynamic Applications built for Dell OpenManage based upon our customers' real-world requirements," said Link. "The Dell ISV certification process validates our work and continues a close relationship with Dell that can only benefit our customers."

"ScienceLogic and Dell share a mutual commitment to simplify the management of disparate infrastructure platforms, applications, and IT services to deliver exceptional value to customers," said Sally Stevens, Director, Platform Marketing, Dell Product Group. " Together we provide solutions that help transform the way customers deploy, utilize, and experience technology."
