- **Chat function & knowledge exchange:** Online answers to all of your questions

**\* From the Market Leader  
in Music Software**

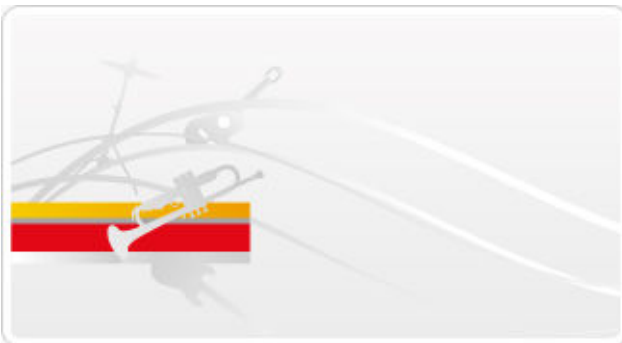

New ideas. New songs.

[www.magix.com](http://www.magix.com)

Produce music with **MAGIX Music Maker 14**: Record, edit, and mix. Everything in perfect audio quality for the most demanding standards. Songs, sounds, and loops are made quickly with the instruments selected – your songs!

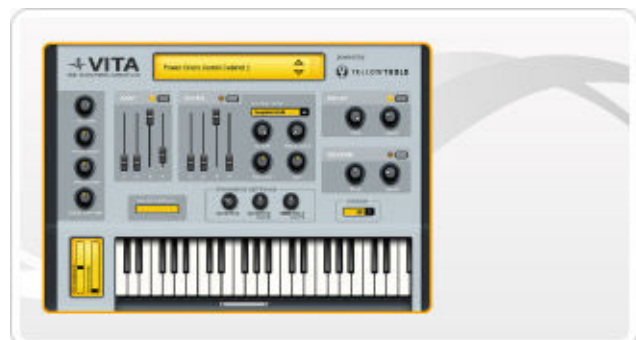

### Start your music projects

The arranger is the heart of MAGIX Music Maker 14. Combine your sounds, loops, and MIDI data on up to 64 channels to complete your song! Plus, internationally successful star producers have gathered together an enormous, exclusive sound archive: Over 3,500 current sounds form an especially high-quality and unbelievably diverse launch pad for your projects, either to help you get started or to complete your existing sample archive.

### NEW! Vital Instruments™ – the new standard

MAGIX Vital Instruments™ are samples in premium quality. Instruments developed by sampling specialists yellow tools combine real recorded instruments with the natural sound characteristics and typical play behaviour of musicians. The advantage: Instruments that sound just like the original with unique fade behavior, up to 11 volume levels, string resonance, sliding string sounds, and more! Experience the fascinating sound library with unbelievable faithfulness to detail and a wide spectrum of various instruments. With the Vita Sound Controller, you can access all parameters directly.

### Beats, drums, and grooves

Would you like to build beats that are clearly different from the others? Robota, the ultimate beat machine, is the first choice when it comes to creative grooves and experimental drum sounds. Not only is Robota especially intuitive to use, but the sound spectrum clearly goes much further than representatives from the 808 and 909 era. The advantage: You have limitless possibilities for designing your grooves.

If you need a convincingly realistic drum beat right away, then grab LiViD, the virtual drummer with human behavior.

### Recording & Sampling

MAGIX Music Maker 14 opens the door to studio standard audio recordings for you. Thanks to easy operation, every recording process becomes a creative session. One click, and recording is on. Want to sample yourself and build your recordings into your own songs? No problem! With MAGIX Music Maker 14, you can build up your own sample archive, record vocals or instruments live, and then optimize them and edit them after.

### Mixing & Effects

The tidy mixer console makes volume, panorama, and effects settings for every track handy at anytime. Take advantage of the integrated studio effects and optimize the sound of your songs, for example, with MAGIX VariVerb: This flexible studio reverb tool simulates every kind of acoustic space and gives your audio material an especially realistic and high-quality effect – ideal for vocals.

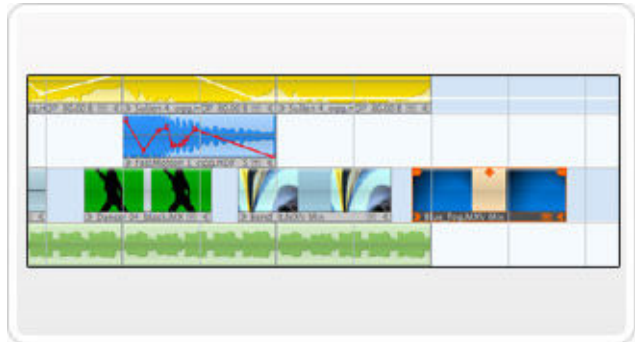

### ProAudio Technology

MAGIX Music Maker 14 is based on Samplitude® audio technology, the professional standard in sound studios, radio stations, and TV stations around the whole world. The advantage: 20 years of experience, absolute sound neutrality, and outstanding effects algorithms.

### Your own music video

With MAGIX Music Maker 14 you can import videos, cut them to match your song and then apply detailed editing. The perfect cut in time to your own beats is anything but complicated with this tool, since film and music are displayed clearly in the same interface. Discover completely new possibilities which result from the combination of sound and film. It's never been easier to produce your own music videos.

### The world of podcasts.

Would you like to create your own podcasts and publish your own shows online? With MAGIX Music Maker 14, you can do both in a flash. Publishing your audio reports can be done with just a click, and you can concentrate completely on the content of your podcast broadcasts.

### NEW! Live user chat & Knowledge portal

Imagine having an answer to all of your questions about producing music. Integrated live user chat offers you the possibility immediately and without time delay to exchange with other users: Just launch the communicator, enter your question, and wait for the answer online. Good contacts will be produced quickly who can help you move forward with your music projects.

If that doesn't help, then take a look at the new online knowledge portal for information all about music production.

### Simply download new sounds

Catooh – the Online Content Library is your online sound archive. Whatever it is that you are looking for – drumloops, instruments, vocals or sound effects – MAGIX® Music Maker 14 provides a direct connection to this giant sound library and supports every one of your song ideas with the right material.
