InfTek, Inc. has been providing hosting services since 2004. We were awarded Kerio messaging certification in mid 2007. Our certified Kerio engineers have over 25 years in email server administration experience.

We are fully supported and backed by Kerio Technologies as one of their select few premier hosted email service providers. InfTek is a

Authorized
Partner

preferred Kerio hosted email provider for MAC user group members. Fast and friendly support is done with our dedicated team of experts. With a 99.999% uptime and no long-term contracts you're sure to have an enjoyable experience with us without being 'locked in'

Secure Kerio MailBoxes

InfTek Kerio hosted email includes 2 gig per mailbox and is fully supported and managed during business hours of 8:00am to 10:00pm EST. All support is handled through our online ticketing system and is fully documented.

We perform nightly backups along with providing our customers with a 14-day archiving of incoming and outgoing email messages. Our server-side Anti Spam and Virus Protection software delivers the best filtering available to make your life much easier. SSL cert encryption makes sure your emails are delivered with a high level of security to give you peace of mind. You'll also enjoy free unlimited aliases and groups.

Reliable Mobility

Get control of your world and Get Sync'd! Our service keeps you connected no matter where you are or what platform you use. Mac or PC. SmartPhone? iPhone? No problem... BlackBerry support through AstraSync or Notify Link, and Simbian support through Roadsync. Apple's iPhone, Windows Mobile, and Palm Trio are supported by Active sync, which is included with your Kerio account with us.

Dedicated Kerio MailServer

Feel like you are outgrowing your shared hosted Kerio services? Inftek offers Fully Managed, and dedicated KerioMail Servers! We can migrate your cost effective shared account to one of our robust dedicated solutions quickly and easily.

You'll be able to remotely administer your users/groups/aliases/forwarding/user rights and password resets through your Kerio admin console. Our team of experts that manage the Kerio servers in our data center handles all reporting and security options. Reporting and security options are available to the admin user with dedicated servers.

All InfTek Kerio servers are monitored by the NOC 24/7 and use hardware RAID; full backups are performed nightly with 14 day message archiving. We have a 2-hour hardware replacement guarantee in case of unforeseen hardware failures.

Redundant Connectivity

Connectivity at our DC2 Data Center is currently provided by:

- 3 Gig E Level3 (3,000 Mbps) fiber optic lines
- 1 Gig E Time Warner Telecom (1,000 Mbps) fiber optic line

Our network is 100% powered by Cisco routers and switches. It is a redundant load balanced network using star topology consisting of two Cisco Catalyst 6500's core routers, and Cisco 3750 & 2950 switches throughout where there is no single point of failure.

The primary objective in designing this facility was to ensure the electrical and mechanical systems were mission critical and equally important, efficiently maintained to support scalability and sustain principal performance. Our data centers include complete redundancy in power, network connectivity, fire suppression, and unparalleled security & safety.

Easy to Get Started

All you need to get started is to complete our simple online order form. After this step your account is provisioned by one of our Kerio administrators which should take about one hour at which point you'll receive a detailed email that will give you all necessary login information as well as detailed DNS information.

We know what it takes to make our clients happy. In doing so, we've been able to keep our customer loyalty at an industry high.

Get InfTek, and Get Sync'd!
