

DEVELOPED IN COOPERATION with top Behavioral Healthcare Professionals.

After listening to practitioners, caregivers, and administrators at all levels, we designed our software to fit the way **you** work.

**IN BUSINESS SINCE 1984, WE SUCCESSFULLY DESIGNED AND DEPLOYED SEVERAL MAJOR WEB-BASED BUSINESS APPLICATIONS AND NOW OUR FOCUS IS STRICTLY ON BEHAVIORAL HEALTHCARE.**

# our philosophy

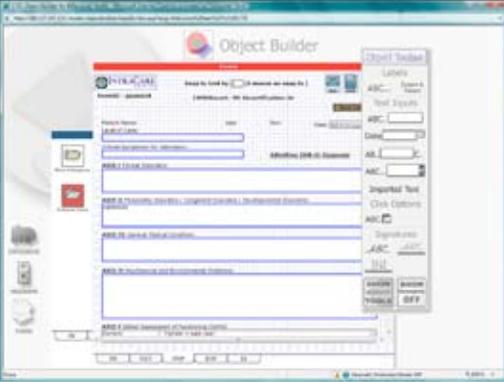

When we began development of CTIS, we focused on a design that would allow us and potential customers to modify and grow the system. By enabling customers, it would allow us to focus on the future of CTIS and would also allow clients to control their environments. **If you need us, we're here to help. If not -- have at it!**

*"CTIS is the first program that was developed for the small psychiatric, outpatient provider. It is easy to navigate and leaves little room for error when documenting all that is necessary during a patient's treatment program. Additionally, it is an affordable product, especially for the smaller provider. I would recommend it to all who want to make documentation compliant and more efficient, making patient time more available to the staff."*

**Convergent Therapy Information System**

- Flexible
- Scalable
- Accessible
- Affordable

**ELECTRONIC RECORDS FOR BEHAVIORAL HEALTHCARE**

"The new EMR system greatly improved efficiency of our staff and overall medical records management. The CTIS team has been ALWAYS available and responsive in immediately addressing our questions regarding the new system, and made modifications based on our program needs. The transitioning process was much easier due to their high professionalism and promptness." -- Jasminka Grgas, LPC

Spend less time on paperwork...

# stressed about finding an EHR?

**WE HAVE WHAT YOU NEED, AT A PRICE THAT MAKES SENSE.**

We've heard and understand all the common obstacles to implementing electronic records in a behavioral health organization.

"It doesn't have the features we need, and making changes is difficult and time consuming. The database is proprietary.

It can't grow with us later on. It does not work like we're used to working.

It costs more than we can afford."

**Our response? CTIS..**

**Obstacles removed.**

and more time where it counts.

## what you've been looking for

We developed CTIS after working with several highly renowned Behavioral Health organizations.

As a result of responding to their varied needs and diverse programs, CTIS has become focused in it's capabilities while at the same time is *highly customizable* in it's design.

- Admission, Evaluation, Treatment, Discharge, Aftercare
- Forms based, the way you're used to working
- Enter data once and share it among pertinent forms
- Share a chart in a multi-user environment
- Streamlined Treatment Plan and Progress (Group) Notes

**FLEXIBLE. OUR SOFTWARE DELIVERS INDUSTRY-STANDARD FORMS, BUT EVERY ORGANIZATION IS DIFFERENT.**

Use CTIS forms as they are, modify them to suit the way you work, or build new ones using our simple drag-and-drop *Form Builder*. The most important thing is, you are not locked in to a system you can't change or one that you have to pay to have changed. Sure, we'll help you out if you don't have time to do it yourself, but you're empowered nevertheless.

**SCALABLE. CTIS IS DYNAMIC AND CAN CHANGE AS YOUR NEEDS CHANGE.**

We engineered CTIS to be *metamorphic*. Forms, form interoperability, and data exchange are described in the database and can be changed easily by you. Use everything CTIS provides or just use some of it. Use more next year when you implement a new program, but feel free to change it first.

**ACCESSIBLE. YOUR DATA DOESN'T BELONG TO US.**

Some systems use a proprietary database that's difficult to work with outside the software it was specifically designed for. We use Microsoft SQL Server™, one of the most popular "open" database applications in the world. An open database is critical because it keeps you in control.

**AFFORDABLE. WE COULD PROBABLY CHARGE MORE, BUT IT WOULDN'T MAKE SENSE TO US.**

We understand the Behavioral Healthcare market. Coverages, reimbursements, regulations, and certifications offer challenges. It's a tough business and if we can help you improve efficiency and reduce costs, then we'll succeed together. At least that's what we believe.
