## KAUZBOTS

Don't mistake these funky-cute, cuddly robots for mere stuffed toys—they're also humanoid humanitarians. Purchasing one not only gives your child an attractive plaything to love and hug, it puts money into the coffers of a deserving charity. What charity? Well, that's up to you; the creators have paired each individual bot with its own cause. So if you buy Calvin, the brown and teal Kauzbot "leader," 10 percent of your purchase will benefit homeless mothers and children through Hearts of Gold (which, incidentally, is led by Smart Cookie Award recipient Deborah Koenigsberger; see page 83). Choose the yellow Karthy and you'll be aiding kids with autism; the deep blue Kruz puts your dollars toward the goal of clean water. Other causes are as varied as refugee relief, early-childhood education, and breast-cancer research. Together, the robots represent a fantastic way to get your children started on the course of giving back.

Unless otherwise noted, all products are available from [Amazon.com](http://Amazon.com).
