## Is your social networking working for you?

Introducing world's first context aware, semantic, event based networking platform – Zahdoo.com

Zahdoo.com is the next generation social computing platform that allows you to engage in social conversations, explore on topics of interest and plan your activities online.

Zahdoo takes social networking to the next level by giving users an insight into the collective mindset while retaining the relevance and significance to your lifestyle. After all social networking can also be productive and meaningful.

In this case, you are the network.
