OmegaScan™

### Retail System Security for PCI DSS Level 2, 3, & 4 Merchants

PCI DSS
Compliant Security

PCI Compliance isn't just a one time task, it's a constant requirement from the payment card industry. OmegaScan's continuous four-step process automates what otherwise would be a rigorous undertaking, allowing retailers to focus on running their businesses instead of systems security.

Systems Management — Verify & Validate — Detect & Collect — Analyze & Alert — Enforce & Remediate
- **Detect & Collect**. A complete and accurate inventory of every device on your network.

- **Analyze & Alert**. Regular system scans flag and alert of potential security vulnerabilities, including unapproved access attempts and unknown software installs.

- **Enforce & Remediate**. Identifies and deploys latest Windows patches; limits network access to only approved applications; optional anti-virus and malware protection.

- **Verify & Validate**. Generates ASV-certified reports and compliance status checks.

"I want to get PCI compliant, fast. I want it to be affordable. And I want someone else to handle it."

Signed, A Very Busy Retailer

Sound like a tall order? Not for companies that subscribe to OmegaScan, the affordable hosted service that accelerates PCI DSS compliance by protecting your retail systems. With a subscription to OmegaScan, you can:

- ✓ Generate required ASV-certified external vulnerability reports
- ✓ Capture data for and produce accurate Annual Self-Assessment Questionnaires

Most importantly, OmegaScan is a true security solution that safeguards your retail systems and your company's good name. The solution scans your systems for both internal and external threats, as required for PCI compliance, and quickly remediates security vulnerabilities.

- ✓ Internal and external scanning
- ✓ Swift response to potential security threats
- ✓ Secure remote control to your stores
- ✓ Windows patch management
- ✓ Activity logs demonstrate compliance
- ✓ Automatic reports; no data crunching required
- ✓ Remote access to administrative console
- ✓ Optional integrated anti-virus and anti-spyware
With OmegaScan, there's no new equipment to buy and install. No time-consuming learning curve. Instead, simply subscribe to the industry's most user-friendly hosted PCI compliance and security solution.

PCI DSS Compliance
Solution For Smaller Retailers

Becoming PCI compliant used to require new hardware, software, and often, outside consulting. We should know. For almost two decades, we've helped retailers large and small effectively secure and manage their store systems.

We realized smaller businesses simply couldn't make this kind of investment. So, we developed **OmegaScan**, one of the first hosted solutions on the market for PCI compliance to provide both internal and external security scans of your workstations and back-office PC systems.

OmegaScan provides smaller retailers the exact same results that previously required a significant investment in people, processes, technology, and infrastructure.

Today, it only takes a subscription to **OmegaScan**'s web-based service to achieve the critical system security requirements for PCI DSS compliance. Retail systems stay secure and running - and so does your business.

An Affordable Hosted Service

Large retailers find PCI compliance just as complex as you do, but they have extensive resources to handle it.

Now you have OmegaScan. No other hosted PCI compliance solution performs this many system security functions for retailers, while requiring no new infrastructure or equipment.

Demonstrates PCI Compliance

✓ Regular ASV-certified vulnerability scans; twelve monthly plus four quarterly

✓ Online Self-Assessment Questionnaires determine PCI compliance progress

✓ Auditable event logs record all system activities, as required by PCI compliance

Secures Your Retail Systems

✓ Regular external and internal scanning for system vulnerabilities

✓ Flags and alerts of potential security threats

✓ Comprehensive Windows patch management

✓ Rapid remediation of unauthorized access and other vulnerabilities

Failsafe Systems and Security

✓ Hosted, secure data center

✓ 24/hour system monitoring

✓ Redundant servers and bandwidth

✓ Backup power generators

✓ Daily backup of log files

Get the Right Answers

Our diverse customer portfolio includes retailers with as few as twenty stores to more than five thousand. After seventeen years serving customers like BP, Conoco Philips, Kwik Trip, Miller & Holmes, and Factory Card & Party Outlet, we understand retail security inside out, no matter the system size or scale. We're happy to explain how the PCI DSS mandates relate to your own unique retail operation. There's absolutely no obligation. Contact us today to learn more.
