

# MP3 Maker 15

Music – legal & free.  
For PCs, laptops & MP3 players.

MAGIX MP3 Maker 15 is a complete music solution for top-notch music recording, playback and easy administration. Perfect playback lists can be automatically created with the unique **mufin audiogen** recommendation technology. Simply play a song, click on "Auto Playlist" and get optimal title suggestions from your collection. The program offers complete support in music recording from the Internet and brings music from CDs to the PC or from your laptop to all standard MP3 players.

The music fan can dive into a three-dimensional music universe, created using similarities between tracks found in the collection. The music fan can dive into a three-dimensional music universe, created using similarities between tracks found in the collection.

The complete solution for music – deluxe playback & management  
import & transform CDs, rename MP3s, get music recommendations

Simply everything for MP3s & other digital audio formats

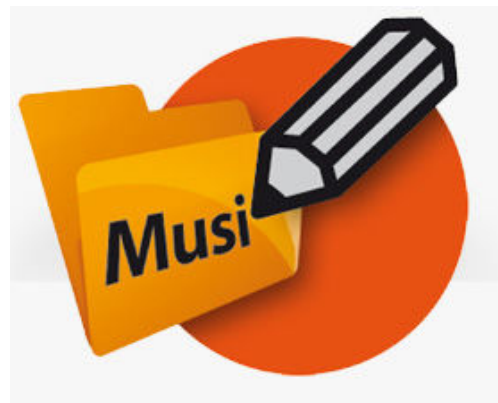

In addition to simple CD import and high-quality Fraunhofer compression technologies, MP3 Maker offers helps and essential tools for everything having to do with digital music. The program combines countless specialized functions with the simple operation of a player to create an intuitive complete package – this is all you need.

### Assign titles to music

As your MP3 inventory grows larger and the sources for new music multiply, it becomes more and more important to create a uniform archiving principle.

To help you along, you will find the features like duplicate title search, detection of tracks with identical audio contents, uniform naming using batch processing, intelligent artist name synchronization and automatic generation of ID3 tags out of file names.

### Record music

Extract new music and exciting reports from more than 5,000 pre-set radio stations, made even easier by timeshift recordings and automatic timer-controlled programming. Just like any other analog recording, all recorded tracks can be cut into single MP3s.

### Music to go

Quick synchronization and secure file exchange with almost all MP3 players and iPods<sup>4</sup> – this is a decisive advantage in the world of short-lived devices.

Burning and copying of CDs or MP3 DVDs for memorable parties, long drives or for enjoying music on the stereo at home is made possible in top quality.

### Share music

With MP3 Maker and any UPnP-enabled device such as an Internet radio receiver, you can instantly share your entire music archive via a standard network between different rooms.

### Auto playlist

Following analysis of all music titles, this function suggests other titles that fit to the song in one playlist. In just a flash you can have enough music for an hour of jogging, a two-hour flight or a three-hour car drive to put into your MP3 player or to a disc.

### Recommendations

The optional window shows the top recommendations to each song in realtime, either from your own music archive or, if you have an active online connection to [www.mufin.com](http://www.mufin.com), from among ca. 3.5 million titles.

### Vision

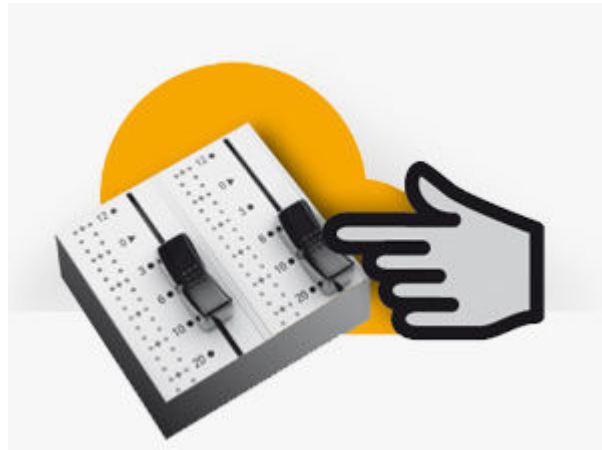

The fantastic 3D journey into the depths of your own music universe is without equals! Various characteristics of your music such as sound density, instrumentation, tempo and others can be freely distributed in the vertical, horizontal and depth dimensions, allowing an intuitive navigation through your own MP3 universe.

### Audio effects, DJ console & Music Editor:

**Better sound** – Normalize, equalizer, maximizer, stereo FX, brilliance, reverb, echo, headphone Surround sound, limiter

**Mix yourself** – Prepare song lists, mix live transitions and adjust tempo using the DJ console.

**Edit everything** - music and vocals in the Music Editor in top quality, edit, repair and trim.

## NEW!

- New rip dialog for CD import, incl. audio book set support
- Recommendation module for title suggestion from your own archive or [www.mufin.com](http://www.mufin.com)
- 3D Vision: Visualize your music universe
- Quick search
- Mufin UPnP: Devices like Internet radio boxes or HiFi receivers may use the auto playlist function in the home network (multi-room music transmission)
- Quick printing for CD booklets and playlists
- Easy MP3 player handling, for example with automatic renaming (sorting) with simple MP3 players without an integrated database
- dynamic playlists
- Resume function, whereby the program notes the last playback position, for example in audio books or Internet radio recordings

1) **softwareeditorial.com, 23.04.2008**

"The good news is that (Mufin Vision) works fantastically well and is one reason alone for buying this product. Goodbye Pandora, welcome Magix.";  
"...Magix MP3 Maker is your one stop shop for all things audio. Excellent."

2) **Essential DVD Maker, 04/2007**

"Features: 5/5"; "Ease of Use: 4/5"; "Overall: 92%"  
"This MP3 all-rounder provides everything for your music ..."

3) **Itreviews.co.uk, 04.05.2007**

"MP3 Maker 12 is easy to control and is organised to provide a logical screen interface ... A very useful music manager at a good price."
