

## New ST1 Safety Enclosures

**COLUMBUS, Ohio (May 22, 2009)** – METTLER TOLEDO is pleased to introduce the ST1 safety enclosure range for safe and efficient weighing.

The ST1 safety enclosure range is the latest generation of containment systems specifically designed to protect the analyst during the weighing process, and has been performance tested specifically for the weighing of active drug compounds. In addition to proven safety performance, the unique design and control features of the ST1 range make these systems the most flexible and user friendly in the industry.

The ST1 range features a chemical resistant marble base to provide stability, and is available with an a1-safetech safe change local extraction and filtration system. It also has the ability to connect directly to an in-house extraction or independent fan filtration. Each ST1 range also includes a dual-point, datalogging alarm that ensures operator safety at all times.

The ST1 containment systems are available in multiple dimensions.

**ST1-900:** 36"x24"x30"

**ST1-1200:** 48"x24"x30"

**ST1-1500:** 60"x24"x30"

Each system can be accessorized based on application needs with numerous items, including: waste bags, ducting kits, printer shelves, fanboxes, waste chutes, airflow smoke kits, external lamps, decontamination wipes, carbon housing, carbon filters and more.

**ST1 Safety Enclosure**

The ST1 range has been containment tested to EN14175 and ASHRAE110, surrogate powder tested by SafeBridge Consultants™, and includes HEPA filters tested to EN1822.

## **About METTLER TOLEDO**

METTLER TOLEDO is a leading global manufacturer of precision instruments. The Company is the world's largest manufacturer and marketer of weighing instruments for use in laboratory, industrial and food retailing applications. The Company also holds top-three market positions in several related analytical instruments markets and is a leading provider of automated chemistry systems used in drug and chemical compound discovery and development.
